*Creating Equitable Classrooms through Action Research* is compelling reading for a wide-ranging audience including professional development participants, preservice and inservice teachers, students of educational administration, and teacher educators. Under the careful editing of Cathy Caro-Bruce, Ryan Flessner, Mary Klehr, and Kenneth Zeichner, the authors of the 10 action research studies reported in the book engage the readers in powerful narratives that capture the power and potential of action research to make a positive change in the lives of children and teachers.

The 10 studies included in Part II are the heart of the book. These studies, individually and collectively, illustrate "the power of action research by teachers to provide concrete improvements in classroom practices that contribute to the narrowing of educational achievement gaps in their own classrooms and schools" (p. xi). The first two chapters set the scene for framing how action research can promote equity in education, and the final chapter links the findings of the individual action research studies to the broader literature on equity issues. As the authors of the final chapter state, "The studies presented in this book provide glimpses into real classrooms and illustrate teachers who are working to attend to their positionalities. The chapter authors are teachers who are developing or have developed, a sociocultural consciousness" (p. 281).

The book presents new research focused on social and educational equity as viewed by teacher researchers. I am not aware of any other action research books that have focused solely on these important educational and social issues. The majority of action research books are focused on describing the process of planning, implementing, and evaluating action research with many texts including examples of published studies across different areas of focus. This book is unique in its focus on equity.

**Professional Learning in an Age of Compliance** Susan Groundwater-Smith, Nicole Mockler, 2009-04-29 Teacher Professional Learning in an Age of Compliance Mind the Gap examines ways in which practice based inquiry in educational settings in a number of different countries and contexts can transcend current ways of working and thinking such that authentic professional learning is the result The authors contend that education policy under pressure from a number of quarters is retreating into a standardized audited and backward looking arena with the advances of more progressive educational philosophy being rolled back In an age where practitioner inquiry and action research have often been hijacked for the purposes of broad based policy implementation this book offers a rationale for reclaiming the critical edge so fundamental to inquiry based professional learning It examines the potential of inquiry based forms of teacher professional learning to contribute to the growth of professional knowledge for and about teachers work The authors intend that the book will assist in building new forms of professional knowledge that go beyond the current compliance model engineered from less enduring materials to inform a new model with its foundations in a strong ethical and moral framework They also believe that this new model if implemented will help to reverse today s conservative educational trends and make teacher professional development a force for genuine progress once again They have consciously moved away from the celebratory tone of much of the academic reporting of teacher professional learning adopting instead a genuinely critical edge In covering a wide range of policies and practices from across the international spectrum they have allowed themselves the freedom to engage in serious epistemological arguments about the nature of professional knowledge as well as how it is constructed and employed *Research, Action, and Change* James M. **Alternative Routes to Teaching** Pamela Lynn Grossman, Susanna Loeb, 2008. Over the past 20 years, alternative certification for teachers has emerged as a major avenue of teacher preparation. The proliferation of new pathways has spurred heated debate over how best to recruit, prepare, and support qualified teachers. Drawing on the work of leading scholars, *Alternative Routes to Teaching* provides a thorough and dispassionate review of the research evidence on alternative certification. It takes readers beyond the simple dichotomies that have characterized the debate over alternative certification, encourages them to look carefully at the trade-offs implicit in any route into teaching, and suggests ways to marry the proven strengths of both traditional and alternative approaches. *Alternative Routes to Teaching* is a timely, thoughtful book about one of the most pressing and controversial problems in American education today. This volume brings new and much-needed sophistication to ongoing debates about teacher preparation. Marilyn Cochran-Smith, Professor of Education, John E. Cawthorne Millennium Chair in Teacher Education for Urban Schools and Director of the Doctoral Program in Curriculum and Instruction, Lynch School of Education, Boston College. A better book on this subject could not have been written. *Alternative Routes to Teaching* is a must-read for everyone involved in planning for the future of teaching. Emily Feistritzer, President and CEO, National Center for Education Information, National Center for Alternative Certification. At a time when the education of teachers is undergoing tectonic shifts, this work by Grossman, Loeb, and their colleagues represents an invaluable contribution. They introduce evidence where empty rhetoric has reigned and offer prudent evaluations of the available data to inform a policy debate dominated by ideology. Lee S. Shulman, President, The Carnegie Foundation for the Advancement of Teaching, and Charles E. Ducommun, Professor of Education Emeritus, Stanford University. Pam Grossman is a professor of education at Stanford University. Susanna Loeb is an associate professor of education at Stanford University and director of the Institute for Research on Educational Policy and Practice. **Key Issues in Teacher Education** J. S.
