### Today's highlights:

- GBPUSD's immediate risk remains topside for 1.5487/92 at first, above which would aim at 1.5621.
- EURGBP below key support at .7368 is needed to see further weakness for our core target at .7258/54.
- EURUSD ideally stays capped below price resistance at 1.1534 to keep the immediate trend lower.
- AUDUSD's focus turns towards price resistance at .7843, above which can see scope for a tougher barrier at .7877/82.
- NZDUSD above the 50% retracement barrier at .7533 can see further strength for .7618/29 next.
- USDJPY ideally holds above price support at 118.16/01.
- EURJPY's spotlight turns to price support at 133.68, below which is needed to mark a small top.
- USDCAD remains locked in a converging range.

### Today's trades/positions:

- EURUSD: Short at 1.1390, stop above 1.1505, for 1.1105.
- USDJPY: Long at 118.30, stop below 117.90, for 119.80.

**Banks, Exchanges, and Regulators** Randal C. Michie, 2020-11-26 Never have financial markets been subjected to a period of change as rapid and extensive as took place from the 1970s onwards In the 1970s global financial markets were controlled by governments compartmentalized along national boundaries and segregated according to the particular activities they engaged in This all disintegrated in the decades that followed under the pressure of market forces global integration and a revolution in the technology of trading One product of this transformation was the Global Financial Crisis of 2008 which exposed the fragility of the new structures created and cast a long shadow that we still live in today The response to that crisis has shaped the global financial system which has been tested once again by the coronavirus pandemic However none of the outcomes of this transformation were inevitable despite the forces at work They were the product of decisions taken at the time for a multitude of reasons Banks exchanges and regulators were faced with unprecedented challenges and opportunities as a revolution swept away traditional ways of conducting banking the methods used to trade in financial markets and the rules and regulations employed to enforce discipline In this book Randal C Michie provides an authoritative and unrivalled account of this upheaval based on a careful and exhaustive reading of the Financial Times over the last four decades using it to provide a source of material unmatched by any other in terms of depth and coverage By studying what happened and why in real time it is possible to explain the decisions taken that shaped the course of the transformation and its repercussions *Unrivaled* Michael C. **Introduction to Global Financial Markets** Stephen Valdez, Philip Molyneux, 2017-09-16 This textbook provides an accessible introduction to finance and financial markets around the world Requiring no previous knowledge of the subject the authors comprehensively cover a broad range of different types of banking markets foreign exchange and derivative products Incorporating recent events and current developments in finance contemporary international examples are used throughout to illustrate this fast moving subject area With Stephen Valdez's decades of experience as a financial trainer and Philip Molyneux's academic experience they are the perfect team for this accessible and applied textbook This textbook is core reading for second and third year undergraduate students studying modules in financial markets and institutions as part of business and management degree courses In addition it is suitable for use on MBA finance courses New to this Edition Provides updated and expanded coverage of the global financial crisis of 2007 08 and its aftermath Explains and contextualises the major structural and regulatory reforms of global banking and financial markets A new design to make it more student friendly such as illustrative boxes that explain key financial issues *Managing Global Risks in the Urban Age* Yee-Kuang Heng, 2016-03-03 The first full length exposition of what it terms a global city global risks nexus this volume crosses disciplinary boundaries to draw upon research from Security Studies Geography Sociology and Urban Studies Innovative in its approach integrating theories about Global Cities with those positing a Global Risk Society Yee Kuang Heng

positions this research in the midst of two concurrent global trends that will gain more significance in coming years The world is experiencing the consequences of not only rapid globalisation but also urbanization In 2008 the UN declared that more than half the world s population was now urban At the same time highly connected global cities like New York London Tokyo and Singapore also face rapidly spreading global risks such as pandemics and financial crises Unique in developing a typology of global risks that threaten a global city like Singapore beyond its Asian focus the book also draws out thematic and policy lessons pertinent to other global cities Global cities do not simply materialize They are dependent on a range of stakeholders at various levels that produce and re produce its command and control capabilities in the face of global risks Singapore s experiences managing global risks in the financial aviation and maritime domains are common concerns shared by many countries and cities that have or aspire to develop similar critical infrastructure

**Fair Economics** Irene Schoene, 2015-09-10 Have you ever questioned our economic model Wondered how the financial crash was able to happen Thought about what we can do stop it happening again Modern economics bases its view of the world on assumptions Adam Smith made about nature and people nearly three hundred years ago in a time when people travelled by horse and carriage and wrote by the light of candles We now live in a globally connected post industrial world of digital communication and advanced technology and yet our economic model remains stuck in the past Taking a thorough look at economics including the history and how we reached our current way of thinking Irene Schoene puts forward an alternative economics that is not only relevant to our modern world of technology and industry but which also shows an awareness of environmental considerations Read this to be enlightened about how economics can be considerate of our environmental situation

**Shredded** Ian Fraser, 2015-10-14 This is the definitive account of the Royal Bank of Scotland scandal For a few brief months in 2007 and 2009 the Royal Bank of Scotland was the largest bank in the world Then the Edinburgh based giant having rapidly grown its footprint to 55 countries and stretched its assets to 2.4 trillion under its hubristic and delinquent former boss Fred Goodwin crashed to earth In Shredded Ian Fraser explores the series of cataclysmic misjudgments the toxic internal culture and the light touch regulatory regime that gave rise to RBS NatWest s near collapse He also considers why it became the most expensive bank in the world to bail out and why a culture of impunity was allowed to develop in the banking sector This new edition brings the story up to date chronicling the string of scandals that have come to light since taxpayers rescued RBS and concluding with an evaluation of the attempts of the bank s post crisis chief executives Stephen Hester and Ross McEwan to dismantle Goodwin s disastrous legacy and restore the damaged institutions to health A gripping account RBS was a rogue business operating in what had become a rogue industry with the connivance of government Read it and weep Martin Woolf Financial Times

**Competition Law and Financial Crime** Diana Johnson, 2025-02-18 Financial crime is a significant drain on economies across the world This book looks at one aspect of financial crime that of benchmark interest rate manipulation by competing banks with the aim of identifying the best approach for the United Kingdom to take

to the enforcement of laws against future benchmark manipulation The manipulation of any benchmark interest rate by bankers colluding for their own gain is likely to negatively affect a large proportion of the population as many people have loans pegged to a benchmark interest rate This monograph investigates the approach the UK took to enforcing action against the benchmark manipulation which took place in the London Interbank Offered Rate and the Foreign Exchange benchmark manipulation scandals As part of this investigation the approaches taken in the European Union and the United States of America are examined and compared to the approach taken in the UK for the same crime to draw conclusions and make recommendations to improve the UK approach for future instances of benchmark manipulation The work fills an important gap in the literature by comparing and evaluating the laws and enforcement policies pertaining to the use of competition law in counteracting benchmark manipulation in the UK EU and US It argues that competition law is an effective enforcement tool when used in the financial services sector and that it provides regulators with a wide range of enforcement options when a breach of competition law is established The book will be a valuable resource for academics researchers and policymakers working in the areas of financial crime competition law comparative law and criminal justice     *Tobacco* Charles A.
