accident in policing as a framework for examining existing police practices Learning from Error in Policing describes a case of wrongful arrest from the perspective of organizational accident theory which suggests a single unsafe act in this case a wrongful arrest is facilitated by several underlying latent conditions that triggered the event and failed to stop the harm once in motion The analysis demonstrates that the risk of errors committed by omission failing to act were significantly more likely to occur than errors committed by acts of commission By examining this case policy implications and directions for future research are discussed The analysis of this case and the underlying lessons learned from it will have important implications for researchers and practitioners in the policing field *Fundamentals of Criminal Investigation* Charles E.
