Green chemistry involves designing novel ways to create and synthesize products and implement processes that will
eliminate or greatly reduce negative environmental impacts Providing educational laboratory materials that challenge
students with the customary topics found in a general chemistry laboratory manual this lab manual enables students to see
how green chemistry principles can be applied to real world issues Following a consistent format each lab experiment
includes objectives prelab questions and detailed step by step procedures for performing the experiments Additional
questions encourage further research about how green chemistry principles compare with traditional more hazardous
