

CHAPTER 1 CONTEMPORARY ISSUES IN ACCOUNTING

Contemporary issue 1.1 abstracts from critical accounting research

- 1. In each of these abstracts the notion of true or fair accounting or financial statements is considered. Identify any requirements in accounting standards or corporations legislation that relate to the truth or fairness of financial statements or reports. (K)**

The accounting standards require that the financial statements provide a fair presentation and state:

Financial statements shall present fairly the financial position, financial performance and cash flows of an entity. Fair presentation requires the faithful representation of the effects of transactions, other events and conditions in accordance with the definitions and recognition criteria for assets, liabilities, income and expenses set out in the Framework. The application of IFRSs, with additional disclosure when necessary, is presumed to result in financial statements that achieve a fair presentation. (IAS 1/AASB 101, para 15). (It should be noted that the concept of faithful presentation and whether there can be a true and fair view is contested and this is discussed in Chapter 2).

In Australia Corporations Law, S297 requires that:

The financial statements and notes for a financial year must give a true and fair view of:

- a) The financial position and performance of the company, registered scheme or disclosing entity; and
- b) If consolidated financial statements are required--the financial position and performance of the consolidated entity.

This section does not affect the obligation under section 296 for a financial report to comply with accounting standards. Note: If the financial statements and notes prepared in compliance with the accounting standards would not give a true and fair view, additional information must be included in the notes to the financial statements under paragraph 295(3)(c).
