The Overview of the Topic was the following One of the most active areas of research in molecular microbiology has been the study of how bacteria modulate their genetic activity and its consequences The prokaryotic world has gained a lot of interest In addition to the above the invention is based on the subject matter of the present invention which is incorporated herein by reference in its entirety All of these processes are fundamental to the operation of a genetic entity and condition their lifestyle Further the discoveries in the bacterial world have been of ample use in eukaryotes Article in German Hansen Hansen H 2003 In addition to the fundamental interest in understanding modulation of prokaryotic lifestyle by DNA binding proteins As it is well known the antibiotic resistance strains of pathogenic bacteria are a major world problem so that there is an urgent need of innovative technologies to tackle it Most of the patients are infected with the virus It is an imperative of finding new alternatives to the classical way of treatment of bacterial infections and these new alternatives Nevertheless These new alternatives will find a dead end if we are unable to obtain a better understanding of the basic processes modulating bacterial gene expression Our goal is to achieve our understanding of protein DNA interactions First the topic will bring together a lot of very active research in the study of gene replication gene regulation the strategies We therefore

want to acquire an in depth knowledge of some of the mechanisms of gene regulation gene transfer and gene replication Further the readers of the papers will realize the importance of the topic and will learn the most recent thinking results and approaches in the area We are fully confident that we have exceeded our expectations Now we are proud to present the final output of the topic which is the eBook It includes 24 articles contributed by 118 authors As of today March 16th January 2017 the total number of readings has reached 19 284 14 921 article views and 2 944 article downloads Control of Gene Expression ,1974 **Gene Expression** S.
