Emerging Technologies for Electric and Hybrid Vehicles Jesús Manuel González Pérez, 2018-10-17 This book is a printed edition of the Special Issue Emerging Technologies for Electric and Hybrid Vehicles that was published in *Energies*

Alternating Current (AC) Heating for Lithium-Ion Batteries in Electric Vehicles Jiangong Zhu, Ranjun Huang, Haifeng Dai, 2025-07-24 This book provides a comprehensive and innovative exploration of low temperature AC heating techniques for lithium ion batteries addressing a critical challenge in electric vehicle EV performance By integrating theoretical insights experimental validations and advanced modeling approaches it offers a systematic framework to understand and optimize battery heating under cold conditions The book introduces novel methodologies such as square wave AC heating and impedance based thermal analysis which significantly enhance heating efficiency while mitigating degradation risks like lithium plating With a focus on practical implementation it also presents cutting edge solutions for AC heating system design including integrated charger and self heating battery pack configurations The intended readership includes researchers engineers and industry professionals in the fields of battery technology electric vehicles and thermal management systems Written at an advanced level the book bridges the gap between academic research and industrial applications making it a valuable resource for both theoretical understanding and practical innovation *Air Conditioning, Heating and Ventilating*
