

NSFAS Challenges

- High expectations amongst students that funding for poor and working class students to cover FCS must be made available by government (based on Polokwane resolution and widespread belief that higher education is a fundamental right): threat to the stability of institutions due to increasing student protests and demands

2. Disbursements by universities

- Disbursements of funds in non pilot institutions: inconsistencies in allocating NSFAS funding across system – each institution has different processes
- Universities allocate loans linked to availability of funding using their own criteria.

2010/11 , Let's Talk About Varsity , 2009 **Creating the New African University** , 2023-05-25 Creating the New African University grapples with the existence of African universities particularly in post independent Africa where Higher Education Institutions HEIs are supposed to live up to the expectations of being adaptive in dealing with prevalent complex dynamic contemporary and future challenges facing African societies The book tackles the issue of what ought to be done for African universities to maintain a structure and identity that ensures their relevance in Africa s development through generating and transforming knowledge into actions for the common good It engages issues within the context of how post colonial transformative obligations have been managed in light of the prevalent epistemological and pedagogical underpinnings that form the foundations of these universities as they seek to break from the clutches of colonial legacies This book further highlights an urgent need to do away with silos and embrace a multidisciplinary interdisciplinary transdisciplinary and cross disciplinary dialogical approach towards knowledge generation Such an approach is essential in efforts aimed at enhancing the sustainable reconfiguration of university structures and functions whilst linking knowledge produced to diverse social economic and political facets of African societies in ways that promote and sustain competitiveness in a rapidly globalising world beset with technological advancements South Africa Can Work Frans Rautenbach, 2017-08-18 What will it take to turn South Africa around In this insightful and provocative book Frans Rautenbach proposes a complete overhaul of policy thinking and provides fresh arguments that effectively address South

Africa's unemployment race problems and lack of education Rautenbach examines the fundamental problem of rent seeking to which he proposes two antidotes the free market and decentralisation of government Along the way he tackles holy cows such as affirmative action trade unions labour law and welfare payments He also addresses contentious topics such as racism white privilege political correctness state funding of higher education and mounting evidence that trade unions substantially suppress employment growth Written by a labour lawyer with a proven track record in a range of policy issues South Africa Can Work speaks effectively to a cross section of readers of all disciplines and brings sorely needed good news

Knowledge Beyond Colour Lines Monwabisi K. Ralarala, Salochana Lorraine Hassan, Rajani Naidoo, 2021-05-25 Knowledge remains timely in education The need for academics to contemplate its relevance worth use and everything in between deems a continuous intellectual project rather than a conundrum to be solved This book takes the South African context by the horns as it challenges the often dormant and traditionalist ways in which higher education spaces see knowledge Through original research and the voices of academics and students this book argues for repurposing knowledge generation knowledge sharing and critical pedagogy so that more inclusive teaching and learning environments can be both imagined and sustained The contentious tensionalities that this creates for LoLT and SoTL in particular are unlocked so as to trouble the South African higher education landscape with the intent to proffer alternative pathways for a knowledge beyond colour lines Prof Shan Simmonds PhD NWU This edited volume bristles with fresh scholarly approaches and insights of an emergent generation of engaged scholars grappling with the issues and problems of higher education in South Africa The issues dealt with here are varied and encompassing They are treated with intellectual delicacy and probing sensitivity articulacy informed data and bold conclusions They serve well Prof Kwesi Kwaa Prah Emeritus Professor of Sociology University of the Western Cape Founder of the Centre for Advanced Studies of African Society *Discrimination in an Unequal World* Miguel Angel Centeno, Katherine S. Newman, 2010-09 Is globalization making our world more equal or less Proponents of globalization argue that it is helping and that in a competitive world no one can afford to discriminate except on the basis of skills Opponents counter that globalization does nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity Yet despite the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination Tackling this challenge *Discrimination in an Unequal World* explores the relationship between discrimination and unequal outcomes in the appropriate geographical and historical context Noting how each society tends to see its particular version of discrimination as universal and obvious the editors expand their set of cases to include a broad variety of social relations and practices However since methods differ and are often designed for particular national circumstances they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared Derived from a broad array of methods the book draws many important lessons on the new means by which the world creates

whether or not to obtain a college degree For many students to obtain a college degree requires financing options which in terms means loan debt Current research suggested that over 80% of students rely on some type of financial aid assistance to help with financing postsecondary educational opportunities The primary focus of this study was to explore if there were any relationships between African American male and female students borrowing habits Results of the study indicate socioeconomic or demographic factors did not play a role in why some students borrow more than others Student Loans and the Dynamics of Debt Brad Hershbein, Kevin M. Hollenbeck, 2015-02-23 The papers included in this volume represent the most current research and knowledge available about student loans and repayment It serves as a valuable reference for researchers and policymakers who seek a deeper understanding of how why and which students borrow for their postsecondary education how this borrowing may affect later decisions and what measures can help borrowers repay their loans successfully *Choice Architecture Versus Price* Xiaoling Ang, 2016 We show that changes in choice architecture have a large effect on student loan decisions while we do not find significant effects of sizeable interest rate changes We evaluate the effect of two policies implemented in 2010 by the U S Department of Education 1 the requirement that all applicants for private student loans fill out a Self Certification Form which includes various disclosures about federal aid and 2 the prohibition of presenting a private student loan as a default option on a financial aid offer without disclosure of the relationship between the school and the creditor Using difference and difference and matching techniques on a proprietary dataset of private student loan originations from the Consumer Financial Protection Bureau and survey and administrative data from the Department of Education we show that these changes decreased private student loan originations by 33% at public four year institutions 18% at private not for profit four year institutions and 55% at four year for profit institutions In contrast we find no consumer response when analyzing 60 basis point decrease in the price of federal Parental PLUS loans at some schools using same datasets and similar estimation techniques **Private Student Loans** Richard Cordray, 2013-02-11 This report details the risky practices and debt that stemmed from the boom and bust of the private student loan market in the past ten years According to the report s estimates outstanding student loan debt in the U S topped 1 trillion in 2011 Students were yet another group of consumers that were hurt by the boom and bust of the financial crisis The report found that too many student loan borrowers were given loans they could not afford and sometimes for more money than they needed They are now overwhelmed by debt and regret the decisions they made There are striking similarities between stories of the private student loan market and stories of mortgage market in the years leading up to the financial crisis Before the financial crisis some lenders in both markets engaged in aggressive marketing and risky underwriting They also originated loans for immediate sale Not all lenders chose this path but enough did to produce a market wide trend Contents of this report Lenders Loan Markets and Products Borrower Characteristics and Behaviors Consumer Protection Fair Lending Issues Recommendations Student Loan Glossary Figures and tables This is a print on

demand report **Student Loan Scams** Matthew Gumke, 2019-09-19 I've made this book so that you don't get scammed by taking out a student loan. Why would you pay 100,000 to listen for 4 years to teachers that have never made more than 50,000 per year? You can't even live on 50,000 per year anymore. Not if you want a half decent life. And people are PAYING to listen to these people. Societal disaster. America is suffering from a debt crisis caused by insane levels of student loans. Colleges are scamming people left, right, and center. What's worse, society doesn't care. Wages have only increased 67% since 1970, yet student loans are exploding to record levels year after year. This along with soaring cost of living has made it nearly impossible for ordinary millennials who go to college to become financially independent in the richest country on earth. If you go to college and study most degrees and use the information you learned in your degree in the workforce, the American dream is dead. As an entrepreneur who's looking to hire millennials, I can tell you that most graduates don't have a clue how to help my businesses. Not only that, they're in a constant state of fear and panic. Even if I pay them a great wage, they can't afford to make ends meet due to their obscene student loans, often at high interest rates. They're trying to get married, buy a house, and have kids, yet their crippling loans make it impossible. Because the elites who own the education system have rigged the education system with intense brainwashing for the last 100 years, colleges no longer need to provide value. They no longer need to help their students make money. They no longer need to help anyone in any way, shape, or form. I'm the founder of Gumke University. Gumke University is known for changing the future of education. I didn't do well in traditional education. I wanted to become a multi-millionaire, and all the teachers I spoke to about it were struggling financially. I knew that he needed to find better teachers outside of traditional education. I wanted to get taught by the people at the top, not their employees. In my pursuit to find the owner of an education company, I found Ekim Kaya, the owner of Kaya Online, the world's largest Amazon training company. I watched Ekim take his business to over 100,000 students and millions of dollars. Many students became millionaires. Thousands of students became financially free. Not everyone was successful, but a much higher percentage than traditional education. All for less than 1% of the cost. I knew that this was the impact I wanted to create. I started to learn high income skills and teach for Kaya Online, having my work translated into multiple languages for Ekim Kaya's 100,000 students. Within just a few years of learning from Ekim Kaya, I was financially independent. Gumke University was established to help the students get rich on their own terms without needing degrees. I believe that my students can improve their health, happiness, and quality of relationships by becoming financially free. The younger the students can achieve this, the better. Unlike many other universities, Gumke University adapts to changes in the marketplace, and Gumke University focuses on tangible results, not theories. Gumke University succeeds when students make money, not when they correctly answer questions about the curriculum. The reality is that some students win, even if they don't know everything in the curriculum, and other students lose, even if they know the entire curriculum. The difference comes down to the mindset of the individual student. At Gumke University, all training programs are set up in a step-by-step system that helps

the students succeed not just the owners of the university Of course I want to succeed as well but I measure my success by the success of my students Learn how to avoid student loan scams and becoming another statistic Financial Aid and Loans for Students Crash Course IntroBooks,2019-12-21 Different schools have different policies regarding how they offer financial aids to students A student seeking financial aid from any particular institution will therefore do well to stay abreast of information about that particular institution and its regulations regarding financial aid Each of these schools has different aims regarding how much of student financial needs they are willing to meet While some schools like Columbia University intend to meet 100% of the students needs financially some other schools go less Grants are given to students without repayment The amount of grant varies based on the level of education and also the complexity of the study work or project In the case of New York University for example grants provided only meet 68% of the student s needs this means the student may experience budget gap This same school gives most of its aids to its students in the form of loans which the student is expected to pay back after graduation Some conditions also determine how much of the student s needs the school can meet A student with solid academic performance for example can benefit from a higher percentage of financial aid compared to another student not having such performance Some other schools consider the financial strength of the student or that of his her parent when offering financial aids However a school like Columbia University mentioned earlier does not utilize such measure to determine who to give student loan and who not to give they give their students aids based on merit alone It translates to the fact that even Bill Gate s son can get student aid based on merit in this school There are several other schools in the same category some of such schools offering their students merit aid are Brown University Pomona College Amherst College Williams College Princeton University and Massachusetts Institute of Technology In calculating merit award the institutions concerned would consider the percentage discount off tuition Private colleges offer average tuition discount of 33 5% this means a student can end up paying only 19 650 if the actual tuition fee is 30 000 The cut represents 33 5% of the actual fee In public college on the other hand the student is given just 15% cut off the actual price When seeking for school financial aid the school can give the student verbal assurance but this is never enough The best guide a student can have regarding financial aids is the Common Data Set Each of the schools in the united states has a Common Data Set it is an amazing document more or less a treasure trove of statistics on the characteristics valued by the school in its application retention freshmen class profile and enrollment The document will equally show the number of students requiring financial aid from the institution concerned as well as the number of students that are given Furthermore the document reveals information about the percentage of student s needs the institution can meet how the awards are split between loans and grants as well as what average package is worth The student can easily search the major search engines for Common Data Set specific for any school The internet can reveal information about in house scholarship and college aids for easy access Such information can equally reveal if a student is qualified for financial aid or not Some schools like Baylor University

provide scholarship calculator on their website which helps the student check eligibility for any particular scholarship program related to the school Eligibility for any scholarship is usually determined by the class rank of the student as well as his her ACT or SAT score *Private Student Loans and Bankruptcy* Xiaoling Ang,2018 Since 1976 Congress has progressively amended the bankruptcy laws to treat some types of student loans differently from other unsecured debt In 2005 student loans originated by private companies loans granted only to credit worthy individuals and risk priced at origination were added to the list of educational loans that are presumptively nondischargeable in bankruptcy Proponents of this change argued that it was necessary to prevent strategic borrower behavior and reduce the cost of consumer credit Focusing on consumers decision making biases opponents predicted that there would be no discernible change in the cost of consumer credit or loan volumes We develop and test theoretical models predicting the effects of the law change on private student loans granted to students at four year undergraduate institutions Using a unique dataset of private student loan originations we test those predictions using ordinary least squares regression Blinder Oaxaca matching and difference in difference methods We find that both opponents and proponents of bankruptcy reform were wrong about the effect of that reform The overall cost of private student loans at four year undergraduate institutions increased by an average of 35 basis points as a result of the law change We also find that the law change caused an expansion of credit for less credit worthy borrowers although the average borrower credit score only decreased slightly in practical terms We attribute a 200% increase in loan volumes to the law change **A Comparison of Student Loans in England and Australia** Nick Hillman,2014
