Stephen B. Bonner, President and CEO, Cancer Treatment Centers of America; Chris Gardner's book comes at the right time for many businesses which can no longer afford the guessing or the hip shooting that has been the solution algorithm in many companies. He points out the systemic thinking that is possible and the discipline that is required to tackle the issues in a sound, responsible and competitively superior way.

Dr. Rainer Famulla, Partner, Andersen Consulting, *The Valuation of Information Technology* tackles the tough problem of defining the value of new technologies company shareholders using integrated analytical techniques. The methodologies presented in the book are essential to any successful new business development. I highly recommend it.

Dr. Khasha Mohammadi, President of Networks and formerly of Bell Labs. Clearly we have entered an era where many organizations are making bet-the-company investment decisions in information technology and the Internet. Unfortunately many of these investments are made on an emotional basis alone. *The Valuation of Information Technology* provides a significant advance in our ability for making these decisions on a more thoughtful analytic basis.

Frank Ostroff, Author of *The Horizontal Organization*. For the first time *The Valuation of Information Technology* marries corporate finance with technology marketing to create a technology decision guide focused on what matters most: shareholder value.
