**The Malaysian Banking Industry** Rozaimah Zainudin, Chan Sok-Gee, Aidil Rizal Shahrin, 2018-06-27 The book provides students and academics in finance and banking with the most recent updates and changes in the Malaysian banking sector post AFC period. The book explores the evolution of banking policies and practices after the Tomyam Goong Crisis and investigates the health of Malaysian banks via efficiency measurement. In addition, it also presents the evolution of bank risk management regulations and practices in Malaysia. The book also discusses the effectiveness of the Malaysian bank bailout strategy with comparison to the banks bailout in developed countries such as the US. This book is important and timely since there are very limited books in the market that cover the recent developments on Malaysian banking sectors post AFC period. Hence, this book serves as the valuable resource for all finance and banking students, academic researchers, and practitioners not limited to the Asian region that require in-depth insights on the latest policies and practices in the Malaysian banking sector.
