Such scholarship is displayed through a teacher's grasp of and response to the relationships between knowledge of content teaching and learning in ways that attest to practice as being complex and interwoven. Yet attempting to capture teachers' professional knowledge is difficult because the critical links between practice and knowledge for many teachers is tacit. Pedagogical Content Knowledge (PCK) offers one way of capturing, articulating, and portraying an aspect of the scholarship of teaching, and in this case, the scholarship of science teaching. The research underpinning the approach developed by the authors offers access to the development of the professional knowledge of science teaching in a form that offers new ways of sharing and disseminating this knowledge. Through this Resource Folio approach, comprising CoRe and PaP eRs, a recognition of the value of the specialist knowledge and skills of science teaching is not only highlighted but also enhanced. The CoRe and PaP eRs methodology offers a new way of capturing and portraying science teachers' pedagogical content knowledge so that it might be better understood and valued within the profession.
