Transport Terminals and Modal

Interchanges Christopher Blow, 2012-05-23 This is the first book to review a trend in transport systems which has only recently come of age the multi modal interchange Separate modes of transport are being linked through joined up thinking and transport designers and authorities are only now able to exploit interchange opportunities This book presents examples of how these new opportunities have been planned and designed and outlines how transfer and mobility can be improved in the future Blow takes the airport as the focal point of true multi modal passenger terminals and presents the development of these buildings as representing a new experience in travel The book shows that the success of the experience of transferring from one mode of transport to another depends on the many factors including congestion in an already overloaded system and the way that designers and managers have addressed contingency planning International examples are drawn from areas where mobility is most concentrated and the demands on design are at their highest The book also addresses important issues of rebuilding and redevelopment where once separate modes of transport are being linked to each other and where short term inconveniences rectify past wrongs in the long term It is a compendium of architectural and engineering achievement

Innovation for Sustainable Aviation in a Global Environment Dietrich Knörzer, Joachim Szodruch, 2012 Jointly organised by the European Commission and the Centre for the Development of Industrial Technology in Spain CDTI the Aeronautics Days sixth edition Aeroday 2011 was held on 30th 31st March and 1st April 2011 in the Palacio Municipal de Congresos of Madrid It brought together 1400 delegates policy makers aerospace manufacturers engineers researchers and customers to report and discuss the challenges and solutions for creating greener safer secure and competitive solutions for aeronautics and air transport in Europe Highlights included Flightpath 2050 Europe s vision for future aviation The present book published by the European Commission brings together about 80 papers selected by a Scientific Advisory Committee with the intention to make broadly known the main themes and issues addressed on the occasion of this Convention Given the strategic importance of the latter these post conference proceedings constitute a reference document providing an overview on aeronautical research within Europe more particularly devoted to Commission supported programmes and networks
