The Career Development Quarterly ,1987 The Weighted Airman Promotion System Michael Schiefer,2008

Because test scores that are part of its enlisted promotion system are not standardized the U S Air Force effectively emphasizes longevity and test taking ability differently across and within specialties and this emphasis varies randomly over time The random aspects of the promotion reward system mean that the Air Force cannot be sure that it is selecting individuals with the highest potential to fill positions of increased grade and responsibility Furthermore not standardizing scores means that some specialties randomly produce higher percentages of senior non commissioned officers The authors discuss a range of outcomes that the Air Force could achieve by adopting various standardization strategies They propose a modification that would not change the policy of equal selection opportunity but would affect selection outcomes within specialties They recommend that the Air Force implement a standardization strategy that will produce predictable outcomes that are consistent with its personnel priorities and policies

HUNDREDTH CONGRESS ,1989 Military Recruiting Outlook Bruce R. Orvis,Narayan Sastry,Laurie L. McDonald,1996

This report describes recruiting trends through early 1995 focusing on changes in youth enlistment propensity and the Army's ability to convert the potential supply of recruits into actual enlistments Using updated survey data and methods of analyzing propensity it concludes that the potential supply of recruits remains higher in FY95 than it was during 1989 when recruiting results were good However the latest survey results indicate some downturn in youth interest in military service When that downturn is coupled with the large increase in accession requirements during FY96 and FY97 the ratio of supply to demand for high quality enlistees could fall short of its predrawdown levels Furthermore survey data show a drop in the rate at which potential high quality recruits discuss military service with key influencers such as family and friends and fewer contacts between recruiters and high school students perhaps due to cuts in numbers of recruiters their reduced presence in high schools or a shift in focus from current students to graduates Taken together these results suggest future difficulties in meeting accession goals which should be countered by increases in recruiting resources such as advertising educational benefits and recruiters
