*Perspectives on Student Affairs in South Africa* McGlory Speckman, Martin Mandew, 2014-07-17 The goal of *Perspectives on Student Affairs in South Africa* is to generate interest in student affairs in South Africa. The papers contained herein are based on best practice local experience and well researched international and local theories. The papers in this book deal with matters pertaining to international and national trends in student affairs, academic development, access and retention, counselling and material support for students coming from disadvantaged backgrounds. They are linked to national and international developments as described in the first two papers. This publication will assist both young and experienced practitioners as they grow into their task of developing the students entrusted to them. All contributors are South Africans with a great deal of experience in student affairs and all are committed to the advancement of student affairs in South Africa. The editors are former heads of student affairs portfolios at two leading South African universities. *Creating the New African University*, 2023-05-25 *Creating the New African University* grapples with the existence of African universities particularly in post independent Africa where Higher Education Institutions (HEIs) are supposed to live up to the expectations of being adaptive in dealing with prevalent complex dynamic contemporary and future challenges facing African societies. The book tackles the issue of what ought to be done for African universities to maintain a structure and identity that ensures their relevance in Africa's development through generating and transforming knowledge into actions for the common good. It engages issues within the context of how post colonial transformative obligations have been managed in light of the prevalent epistemological and pedagogical underpinnings that form the foundations of these universities as they seek to break from the clutches of colonial legacies. This book further highlights an urgent need to do away with silos and embrace a multidisciplinary, interdisciplinary, transdisciplinary and cross disciplinary dialogical approach towards knowledge generation. Such an approach is essential in efforts aimed at enhancing the sustainable reconfiguration of university structures and functions whilst linking knowledge produced to diverse social, economic and political facets of African societies in ways that promote and sustain competitiveness in a rapidly globalising world beset with technological advancements. **Social Justice and Education in the 21st Century** Willie Pearson Jr., Vijay Reddy, 2021-04-10 The world is not an equal place. There are high and low income countries and high and low income households. For each group there are differential educational opportunities leading to differential educational outcomes and differential labor market opportunities. This pattern often reproduces the privileges and inequalities of groups in a society. This book explores this differentiation in education from a social justice lens. Comparing the United States and South Africa, this book analyzes each country's developmental thinking on education from human capital and human rights approaches in both primary and higher education. The enclosed contributions draw from different disciplines including legal studies, sociology, psychology, computer science and public policy. *The Routledge Handbook of Disability in Southern Africa* Tsitsi Chataika, 2018-07-27 This comprehensive
