MyLab Math Differential Equations Computing and Modeling blends traditional algebra problem solving skills with the conceptual development and geometric visualization of a modern differential equations course that is essential to science and engineering students. It balances traditional manual methods with the new computer based methods that illuminate qualitative phenomena, a comprehensive approach that makes accessible a wider range of more realistic applications. The book starts and ends with discussions of mathematical modeling of real world phenomena evident in figures, examples, problems, and applications throughout. For the first time MyLab™ Math is available for the 5th Edition, providing online homework with immediate feedback, the complete eText, and more. Additionally, new presentation slides created by author David Calvis are now live in MyLab Math, available in Beamer, LaTeX, and PDF formats. The slides are ideal for both classroom lectures and student review, and combined with Calvis' superlative videos, offer a level of support not found in any other Differential Equations course. Also available with MyLab Math, MyLab™ Math is the teaching and learning platform that empowers instructors to reach every student. By combining trusted author content with digital tools and a flexible platform, MyLab Math personalizes the learning experience and improves results for each student.
