3. For each of the situations below use an arrow to indicate the net movement of sugar into or out of the cell. (Assume that the sugar molecules can pass through the cell membrane in each case.)

4. Diffusion always causes particles to move from a region of high concentration to a region of low concentration.

5. Does a cell use energy when molecules diffuse in or out of the cell? no

Why?

because diffusion is passive movement of particles. And no energy is needed for it to happen.
