Their Rock Is Not Like Our Rock Daniel Strange, 2015-02-03 The reality of the West's post Christendom multiethnic multicultural context has meant that more than ever Christians face questions posed not simply by the existence of other religions but also by their apparent flourishing If secularization is alive and well then so too is society's sacralization Hence a theology of religions is arguably the most significant concern confronting Christian mission and apologetics in the twenty first century There has been little evangelical theology offering a detailed comprehensive and biblically faithful analysis not only of the question of salvation but also questions of truth the nature and history of human religiosity and a host of other issues pertaining to Christian apologetics and contextualization amid religious pluralism In *Their Rock is Not Like Our Rock* lecturer and vice principal of Oak Hill College in London Daniel Strange explores these issues and offers the beginning of a theology of other religions

**Principles of Igneous and Metamorphic Petrology**

Anthony Philpotts, Jay Ague, 2009-01-29 This textbook provides a basic understanding of the formative processes of igneous and metamorphic rock through quantitative applications of simple physical and chemical principles The book encourages a deeper comprehension of the subject by explaining the petrologic principles rather than simply presenting the student with petrologic facts and terminology Assuming knowledge of only introductory college level courses in physics chemistry and calculus it lucidly outlines mathematical derivations fully and at an elementary level and is ideal for intermediate and advanced courses in igneous and metamorphic petrology The end of chapter quantitative problem sets facilitate student learning by working through simple applications They also introduce several widely used thermodynamic software programs for calculating igneous and metamorphic phase equilibria and image analysis software With over 350 illustrations this
