## Introduction to JavaCC

### 1.1 JavaCC and Parser Generation

JavaCC is a parser generator and a lexical analyzer generator. Parsers and lexical analyzers are software components for coding, which inputs of character sequences. Compilers and interpreters incorporate lexical analyzers and parsers to dispatch their understanding processes. Numerous lexical analyzers and parsers can be used in a wide variety of other applications, as I hope the examples in this book will illustrate.

So what are lexical analyzers and parsers? Lexical analyzers can break a sequence of characters into a subsequence called tokens and is also classified the tokens. Compiler is about programs in the C programming language.

```
int main() {  
    return 0;  
}
```

The lexical analyzer of a C compiler would break this into the following sequence of tokens

```

Multi Agent Programming is an essential reference for anyone interested in the most up to date developments in MAS programming. While previous research has focused on the development of formal and informal approaches to analyze and specify Multi Agent Systems this book focuses on the development of programming languages and tools which not only support MAS programming but also implement key concepts of MAS in a unified framework. Part I describes approaches that rely on computational logic or process algebra. Jason 3APL IMPACT and CLAIM SyMPA. Part II presents languages and platforms that extend or are based on Java JADE Jadex and JACKTM. Part III provides two significant industry specific applications. The DEFACTO System for coordinating human agent teams for disaster response and the ARTIMIS rational dialogue agent technology. Also featured are seven appendices for quick reference and comparison.

**Enterprise Java Performance** Steven L. Halter, Steven Jay Munroe, 2001  
A collection of 24 humorous mountain man tall tales these stories are narrated in a loose kind of verse in the voice of a tough and experienced early 19th century Rocky Mountain fur trapper. While a few of the tales are retellings of whoppers by famous historical mountain men most are original outrageous lies of the author's own related in the mountaineer tradition. All of the stories contain glimpses of the difficult dangerous life of that rowdy breed of men who challenged the uncharted wilderness and triumphed because of their courage fortitude and unquenchable laughter in the face of hardship and peril.
