

In one brief sentence, explain what the mechanical hound is, and its purpose.

The mechanical hound is a metallic dog-like robot, used to hunt down and kill criminals.

What is a **PARADOX**?

A paradox is a seemingly contradictory statement which actually holds some truth.

Identify a quote which shows that the hound is paradoxical.

"... The Mechanical Hound slept but did not sleep, lived but did not live"
"... the dead beast, the living beast"

What's your opinion of the 'game' the men play with the hound?

[Student's own opinion]

It was like a great bee come home from some field where the honey is full of poison wildness, of insanity and nightmare.

If Clarisse were an animal, she would be:

because

Creative Exercise

According to Clarisse, what do her peers talk about?

Clothes, cars, and swimming pools; nothing contentious.

Why does she have an issue with this?

To Clarisse, these topics are shallow and meaningless. She is annoyed by the way nobody disagrees with each other; she values critical thought and the exchange of complex ideas.

Montag sees Clarisse like a daughter.

"You make me feel very old and very much like a father."

Montag starts channeling Clarisse in his thinking.

He opened his mouth and it was Clarisse McClellan saying, "Didn't firemen prevent fires rather than stoke them up and get them going?"

Montag is worried the hound is going to attack him.

"This isn't the first time it's threatened me," said Montag. "Last month it happened twice."

THE MECHANICAL HOUND

Re-read the description of the mechanical hound, & then draw and label an image of it below.

Creative Exercise

What feelings does Montag have for the hound?

☒ pity

☐ admiration

☐ love

☐ sadness

☐ indifference

☒ fascination

☒ fear

☐ annoyance

☐ anger

If you had to name the hound, it would be called:

Clarisse says:

"It's a lot of funnels and a lot of water poured down the spout and out the bottom, and them telling us it's wine when it's not."

This quotation contains which of the following?

☐ pun

☐ simile

☒ metaphor

☐ allusion

In your own words, explain what she's saying:

She thinks that education is false and disingenuous; that the school system serves to just fill students up with insubstantial knowledge and pretend it is valuable.

How similar or different is this to the education system in **your own society**? Explain.

Chapter 3 Mammals Section 3 Answer:

Mammalian Vestibular Physiology V. J. Wilson, 2013-06-29 It is easy to underrate the importance of a sensory system whose receptor is buried deep within the skull and of whose performance we are usually not aware. It is only when it malfunctions that we know we have a vestibular system. Unraveling the mechanisms by which activation of the vestibular labyrinth exerts its varied effects presents a great challenge which increasing numbers of investigators are rushing to meet. At this time a period of transition appears to have been reached. On the one hand physiological and anatomical techniques have provided extensive information about the properties of the receptor and of some of the pathways that link it to the musculature. On the other hand extensive behavioral and psychophysical studies provide different insights into the mechanisms involved in vestibular reflexes. Until recently there has been relatively little interaction between the practitioners of these two widely different approaches. It has been our goal to assess and describe the progress that has been made in both areas and when possible to make a synthesis of the results. As will be seen numerous questions are raised in the process and we hope that they will help in pointing the way to further investigations. We are grateful to the authors and publishers who gave permission to reproduce many of the figures and to our colleagues who have read and commented on all or part of the manuscript. Victor J.

Gene Expression and Regulation in Mammalian Cells Fumiaki Uchiyama, 2018-02-28 Sixty years after the central dogma, great achievements have been developed in molecular biology. We have also learned the important functions of noncoding RNAs and epigenetic regulations. More importantly, whole genome sequencing and transcriptome analyses enabled us to diagnose specific diseases. This book is not only intended for students and researchers working in laboratory but also physicians and pharmacists. This volume consists of 14 chapters divided into 4 parts. Each chapter is written by experts investigating biological stresses, epigenetic regulation, and functions of transcription factors in human diseases. All articles presented in this volume by excellent investigators provide new insights into the studies in transcriptional control in mammalian cells and will inspire us to develop or establish novel therapeutics against human diseases.

Interpreting TRIPS Hiroko Yamane,2011-03-21 Protection of intellectual property rights IPRs has become a global issue The Trade Related Aspects of Intellectual Property TRIPS Agreement outlines the minimum standards for IPR protection for WTO members and offers a global regime for IPR protection However the benefits of TRIPS are more questionable in poorer countries where national infrastructure for research and development R D and social protection are inadequate whereas the cost of innovation is high Today after more than a decade of intense debate over global IPR protection the problems remain acute although there is also evidence of progress and cooperation This book examines various views of the role of IPRs as incentives for innovation against the backdrop of development and the transfer of technology between globalised knowledge based high technology economies The book retraces the origins content and interpretations of the TRIPS Agreement including its interpretations by WTO dispute settlement organs It also analyses sources of controversy over IPRs examining pharmaceutical industry strategies of emerging countries with different IPR policies The continuing international debate over IPRs is examined in depth as are TRIPS rules and the controversy about implementing the flexibilities of the Agreement in the light of national policy objectives The author concludes that for governments in developing countries as well as for their business and scientific communities a great deal depends on domestic policy objectives and their implementation IPR protection should be supporting domestic policies for innovation and investment This in turn requires a re casting of the debate about TRIPS to place cooperation in global and efficient R D at the heart of concerns over IPR protection
