Everyday Identity and Electoral Politics Adam S. Harris, 2022 In *Everyday Identity and Electoral Politics* Adam S. Harris explores how social identities such as ethnicity and race influence politics economic development and voting behavior in Sub Saharan Africa Drawing upon original survey data interviews focus groups and participant observations Harris conceptualizes a theory of identity construction that both predicts differences in vote choice and theorizes how the identity construction process shapes differential outcomes in vote choice within ethnic groups It is one of the first studies that directly links the every day ethnic identity construction process with voting behavior and it is the first to do so using a continuous conceptualization of ethnicity i e one capable of shifting over time

THE IMPACT OF ECONOMIC PERCEPTIONS ON SUPPORT FOR THE INCUMBENT GOVERNMENT: TESTING DIFFERENT PERSPECTIVES ON HOW INDIVIDUALS ASSESS THE STATE OF THE ECONOMY Andreea STANCEA, 2025-01-01 This book explores the relationship between individuals economic perceptions and their support for incumbent governments in elections placing much emphasis on how personal economic well being influences voting decisions Based on the theory of economic voting it analyzes the extent to which favorable economic perceptions enhance the probability of re electing the incumbent The book uses rational choice models to investigate variables such as macroeconomic indicators and individual beliefs The present case study refers to Romania drawing comparisons with a number of European countries especially those situated in the core and periphery of the EU Analysis of the data from the 2012 Romanian Elections Study and the 2019 European Electoral Study serves to test these hypotheses The empirical research conducted in this book provides a comparative analysis of economic perceptions and government support presenting new evidence of the influence of economic perceptions on electoral behavior in transition economies The book finally states that political decisions by the public are driven by retrospective prospective sociotropic and egotropic views about the economy

Ideology and Spatial Voting in American Elections Stephen A. Jessee, 2012-06-29 The central feature

of democracy is that the will of the people determines the policies enacted by the government. In representative democracies such as the United States, citizens influence the government primarily through voting in elections. The success of democratic governance therefore rests in large part on the ability of citizens to select leaders who will act in accordance with their policy preferences. In the end, a government lives up to this democratic ideal or doesn't through the enactment of specific policies. How then do citizens' votes relate to their preferences over government policy outputs? What intervening factors either assist or interfere with voters' selection of candidates who espouse views closest to their own? Understanding the relationship between citizens' policy views and their voting behavior is central to the evaluation of elections and of democratic governance more generally. This book studies the opinions of ordinary citizens on specific policies and the relationships between these policy views and people's vote choices in presidential elections. Specifically, I focus on testing the empirical implications of spatial theories of voting which in their simplest form assume that each citizen's policy views can be represented by a location on some liberal-conservative policy spectrum with candidates in a given election each taking a position on this same dimension. Each voter then casts his or her ballot for the candidate whose position is closest to the voter's own ideological location. Provided by publisher

The Importance of Campaign Promises Tabitha Bonilla, 2022-02-03 Campaign promises are a cornerstone of representative democracy. Candidates make promises to signal to voters their intentions in office and voters evaluate candidates based on those promises. This study unpacks the theorized pathway regarding campaign promises: not whether promises are kept but what purpose promises serve, what they signal, and how they affect voter decision making. The author explores the pathways and conditions influencing promises and finds that promises tend to have a polarizing effect on voters' opinions of politicians, attracting similarly positioned voters and strongly repelling voters who disagree with a candidate's position. In addition, voters perceive promise breakers as less honest and less likely to follow through than candidates who more weakly took the same position. With a wealth of data and fascinating case studies, this book is full of important insights into electoral psychology and the study of promises, campaigning, and representation.

Public Finance and the Political Process Randall G. Holcombe, 1983 Holcombe presents theoretical models, melds theory and empirical work, and juxtaposes economics and political science. Further, he provides insights into such concepts as agenda control, points out the advantages of incumbency, explains government as a natural monopoly, establishes an updating of the social contract, and examines the virtues of common law in contrast to statutory law. In his final chapters, Holcombe provides a foundation upon which the preceding chapters are logically built. From his analysis, it appears that there is an approximate correspondence between voter preferences and political outcomes as depicted by a median voter model, but that for many reasons, resource allocation through the public sector is considerably less efficient than through the private sector.
