Autodyn Theory Guide:

Concrete Structures Under Projectile Impact Qin Fang, Hao Wu, 2017-03-22 In this book the authors present their theoretical experimental and numerical investigations into concrete structures subjected to projectile and aircraft impacts in recent years Innovative approaches to analyze the rigid mass abrasive and eroding projectile penetration and perforation are proposed Damage and failure analyses of nuclear power plant containments impacted by large commercial aircrafts are numerically and experimentally analyzed Ultra high performance concrete materials and structures against the projectile impact are developed and their capacities of resisting projectile impact are evaluated This book is written for the researchers engineers and graduate students in the fields of protective structures and terminal ballistics Proceedings of the 2012 International Conference on Communication, Electronics and Automation Engineering George Yang, 2012-08-14 This book is a collection of selected papers from the 2011 International Conference on Communications Electronics and Automation Engineering hold in Xi an China August 23 25 2012 It presents some of the latest research findings in a broad range of interdisciplinary fields related to communications electronics and automation engineering Specific emphasis is placed on the following topics automation control data mining and statistics simulation and mathematical modeling human factors and cognitive engineering web technology optimization and algorithm and network communications The prime objective of the book is to familiarize the readers with cutting edge developments in the research of electronics and automation engineering with a variety of applications Hopefully the book can help researchers to identify research trends in many areas to learn the new methods and tools and to spark innovative ideas Rock Fragmentation by Blasting Pradeep K. Singh, Amalendu Sinha, 2012-11-05 Rock Fragmentation by Blasting contains the papers presented at the 10th International Symposium on Rock Fragmentation by Blasting New Delhi India 26 29 November 2012 and represents the most advanced forum on blasting science and technology The contributions cover all major recent advancements in blasting and fragmentation from realistic tre **Urban Habitat Constructions Under Catastrophic Events** Federico M. Mazzolani, 2010-08-27 COST is an intergovernmental framework for European Cooperation in Science and Technology allowing the coordination of nationally funded research on a European level Part of COST was COST Action C26 Urban Habitat Constructions Under Catastrophic Events which started in 2006 and held its final conference in Naples Italy on 16 18 September 201 **Electrical Measuring Instruments and Measurements** S.C. Bhargava, 2012-12-27 This book written for the benefit of engineering students and practicing engineers alike is the culmination of the author s four decades of experience related to the subject of electrical measurements comprising nearly 30 years of experimental research and more than 15 years of teaching at several engineering institutions The unique feature of this book apart from covering the syllabi of various universities is the style of presentation of all important aspects and features of electrical measurements with neatly and clearly drawn figures diagrams and colour and b w photos that illustrate details of instruments among other things making the text easy to follow and

comprehend Enhancing the chapters are interspersed explanatory comments and where necessary footnotes to help better understanding of the chapter contents Also each chapter begins with a recall to link the subject matter with the related science or phenomenon and fundamental background The first few chapters of the book comprise Units Dimensions and Standards Electricity Magnetism and Electromagnetism and Network Analysis These topics form the basics of electrical measurements and provide a better understanding of the main topics discussed in later chapters The last two chapters represent valuable assets of the book and relate to a Magnetic Measurements describing many unique features not easily available elsewhere a good study of which is essential for the design and development of most electric equipment from motors to transformers and alternators and b Measurement of Non electrical Quantities dealing extensively with the measuring techniques of a number of variables that constitute an important requirement of engineering measurement practices The book is supplemented by ten appendices covering various aspects dealing with the art and science of electrical measurement and of relevance to some of the topics in main chapters Other useful features of the book include an elaborate chapter by chapter list of symbols worked examples exercises and quiz questions at the end of each chapter and extensive authors and subject index This book will be of interest to all students taking courses in electrical measurements as a part of a B Tech in electrical engineering Professionals in the field of electrical engineering will also find the book of use

Ballistics 2011 Ernest Baker,Douglas Templeton,2011-09 Includes papers that were first presented at a September 2011 conference organized by the National Defense Industrial Association and the International Ballistics Society This title includes a CD ROM that displays figures and illustrations in articles in full color along with a title screen and main menu screen

Advances in Mechanical Engineering (ICME) Mark Zhou,2011-03-28 Selected peer reviewed papers from 2011 First International Conference on Mechanical Engineering April 3 4 Phuket Thailand 2011 *Shock Compression of Condensed Matter - 2005* Michael D. Furnish,2006-08-24 This book constitutes the Proceedings of the Conference of the American Physical Society Topical Group on Shock Compression of Condensed Matter Baltimore Maryland USA 2005 The volume embodies the most recent research on shock compression of condensed matter and includes 363 plenary invited and contributed papers all peer reviewed Topics include equations of state phase transitions chemical reactions warm dense matter fracture geophysics and planetary science energetic materials optical studies and more *Hyper-Velocity Impacts on Rubble Pile Asteroids* Jakob Deller,2016-12-01 The thesis presents a tool to create rubble pile asteroid simulants for use in numerical impact experiments and provides evidence that the asteroid disruption threshold and the resultant fragment size distribution are sensitive to the distribution of internal voids This thesis represents an important step towards a deeper understanding of fragmentation processes in the asteroid belt and provides a tool to infer the interior structure of rubble pile asteroids Most small asteroids are rubble piles re accumulated fragments of debris from earlier disruptive collisions The study of fragmentation processes for rubble pile asteroids plays an essential part in understanding their collisional evolution

An important unanswered question is what is the distribution of void space inside rubble pile asteroids. As a result from this thesis numerical impact experiments can now be used to link surface features to the internal structure and therefore help to answer this question. Applying this model to asteroid Teins which was imaged from close range by the Rosetta spacecraft a large hill like structure is shown to be most likely primordial while a catena of pits can be interpreted as evidence for the existence of fracturing of pre existing internal voids. Problems Involving Thermal-hydraulics, Liquid Sloshing, and Extreme Loads on Structures Frederick J. Moody, 2004 **Journal de physique**, 2006 *Structures Under Shock and Impact VII* Norman Jones, C. A. Brebbia, A. M. Rajendran, 2002 The shock and impact behaviour of structures is an extremely challenging area. It is therefore important to recognize and utilize the contributions emerging from theoretical numerical and experimental studies on structures as well as investigations into material properties under dynamic loading conditions.

Shock Compression of Condensed Matter - 2001 Michael D. Furnish, Naresh N. Thadhani, Yasuyuki Horie, 2002-07-12 Part One and Part Two **Space Cooperation Into the 21st Century** Peter M.
