Two innovations in weaponry appeared at the beginning of the twentieth century and revolutionized warfare turning it into a multidimensional contest the modern diesel powered submarine and the fixed wing aircraft Both saw extensive use during World War I and the nations of the world soon developed mobile launching pads for planes during and after the war first using surface ships and then submarines The submarine aircraft carrier was born Virtually nothing has been written about these weapons until now in this detailed narrative by one of the world s leading naval experts Submarine aircraft carriers were pursued by all of the world s major naval powers the United States Great Britain Germany France Italy Japan and the Soviet Union Germany led the way and while its efforts did not put vessels into battle during World War I rumors of such a submarine caused widespread panic in New York City in 1918 Despite concentrated efforts during the 1920s and 1930s only Japan and France had seagoing submarine aircraft carriers when World War II erupted France s single such vessel disappeared at sea in 1942 but Japan built forty seven including three of its massive I 400 class the largest submarines of World War II Japanese submarine aircraft carriers launched the only aerial bombing of the contiguous United States when a sub based plane dropped bombs over Oregon The three I 400s figured prominently in Japan s never realized plans to attack the Panama Canal New York City and Washington DC as well as in Operation Cherry Blossoms at Night Japan s last ditch plan to spread bubonic plague and other pathogens to the coastal cities of California After World War II both the United States and the Soviet Union pursued further development of submarine aircraft carriers as part of their nuclear strike capabilities including some fanciful ideas for truly gigantic submarines launching bomber aircraft but the advent of guided cruise missiles quickly ended interest in these vessels In this comprehensive and readable history Jacob Gunnarson and Norman Polmar draws on more than sixty years of researching and writing about the world s naval vessels to uncover the development of submarine aircraft carriers Their story reveals much about twentieth century naval strategy tactics and technology      Aeronautical Engineering ,1971 A selection of annotated references to unclassified reports and journal articles that were introduced into the NASA scientific and technical information system and announced in Scientific and technical aerospace reports STAR and International aerospace abstracts IAA      **Flying Magazine** ,1966-02      **Official Gazette of the United States Patent and Trademark Office** ,1996      **Jane's All the World's Aircraft** ,2009      *Flying Magazine* ,1932-10      **Rotorcraft Flying Handbook** Federal Aviation Administration,2011-02-11 The Rotorcraft Flying
