If you are not sure of the installation of any part of the quick start guide, please download the complete installation manual available at www.autopageusa.com. This quick start guide is a brief summary for professional installers that are familiar with the installation and operation of the remote start system. Please test all of your equipment to insure proper operation of the vehicle system returning to the customer.

For additional technical support, please call 800-888-8888 and visit our website www.autopageusa.com. Technical support hours are Monday through Saturday from 9:00 to 5:00 Pacific Standard Time.

The Remote Starter with Remote Entry System has been designed to be installed on Transponder systems with an automatic transponder (AT-10).

NOTE: Turn the system power OFF before installation. The system will not work if the battery voltage is not 12VDC.

This system must be installed and tested through a safety switch so it will not start in any forward or reverse gear.

Some automatic transponder vehicles having other OEM vehicles with a remote starter may have a mechanical key, key, safety switch, or other safety switch. The mechanical key does not interrupt the starter circuit when the transponder is in any gear and does not allow the 100% level of safety required for remote starting operation. Therefore, our system should never be installed on any vehicle that uses a mechanical key, key, safety switch.

Once you install this system, you must verify that the vehicle will not start in any forward or reverse gear regardless of the type of vehicle.

NOTE: Turn the system power OFF before installation. The system will not work if the battery voltage is not 12VDC.

Some vehicles have a factory installed transponder transponder system that can severely compromise the installation. There is a possibility that the system cannot be installed on some automatic transponder vehicles.

Some vehicles have an AT-10 or any system, the vehicle can start and do not provide any level of the OEM system.

NOTE: Turn the system power OFF before installation. The system will not work if the battery voltage is not 12VDC.

Disconnect the air battery before beginning work on the vehicle.

Check battery polarity before wiring any battery. Ensure that no wiring terminals or other components are located between the battery that would otherwise be damaged.

The use of non-standard wiring, such as any wiring that wiring, is a safety issue and may result in fire, injury, or property damage. The suggested wiring of connection points.

NOTE: Turn the system power OFF before installation. The system will not work if the battery voltage is not 12VDC.

Install the wiring neatly under covers or within the to prevent possible damage to wires.
