Responses B. Fritig,M. Legrand,2012-12-06 Research on the mechanisms of plant defense responses to stress and pathogen
attack has attracted much attention in recent years This increasing interest stems from the fact that the tools of molecular
biology now enable us to study the molecular basis of old biological concepts such as host pathogen recognition and
particularly the gene for gene relationship hypersensitive cell death and systemic acquired resistance Our knowledge about
avirulence and resistance genes elicitors signal transduction and genes involved in plant defense is rapidly expanding
Moreover we are just beginning to test in planta the potential of these results for biotechnological applications aimed at
improving plant resistance to diseases The 2nd Conference of the European Foundation for Plant Pathology hosted by the
Societe Fran aise de Phytopathologie was devoted to Mechanisms of plant defense responses and was held in Strasbourg
France It brought together over 350 scientists from universities research institutes and private sectors of 24 countries Major
advances in the areas under study have been reviewed in plenary lectures and are developed in the main articles of this book
Over 160 high quality posters were presented and are summarized in short articles Data from outstanding posters which
were discussed after a short oral presentation are found in extended articles As a whole the book presents a collection of
papers arranged in six sections and reflecting the present day state of the art of research in the field of plant defense
reactions The Cumulative Book Index ,1901 A world list of books in the English language □□□□□□□□ ,1976 U.S.
