Mason, MD, 2021-04-13 This book functions as an essential guide to the safe and effective sedation of pediatric patients outside the operating room It is a multidisciplinary reference that features an international authorship and is also of use for a broad range of specialists who deliver pediatric sedation in the non OR setting Organized into four parts Pediatric Sedation Outside of the Operating Room 3rd edition begins with the foundational history of the pediatric sedation field Subsequent chapters explore the basics of procedural sedation pre sedation assessments and sedation policies across various specialties and continents Part two then examines a multitude of sedation models divided by geographical location and subspecialty Following this Part three delves into standards of safety in sedation including medicolegal risk factors neurocognitive side effects and aspiration risks

The book closes with chapters presenting discussions on the future of sedation insofar as predictions for the role of simulation medical malpractice and the intersection of sedation and marijuana. An updated invaluable successor edition, *Pediatric Sedation Outside of the Operating Room* 3rd edition, is accessible to a diverse group of sedation providers from all specialties. This textbook is an invaluable and necessary addition to all sedation providers worldwide. **Nurses Handbook of Obstetrics** Louise Zabriskie, 1937. *Pediatric Sedation Outside of the Operating Room* Keira P. Mason, 2014-10-11. This is a major revision updating and expansion of the leading single source volume on pediatric sedation outside of the operating room. Edited and written by an international roster of outstanding experts, it is the only book aimed at the broad range of specialists who deliver pediatric sedation in the non-OR setting. The Second Edition features a significant expansion of contributions from international leaders and individual new chapters on pre-sedation assessment, sedatives, short and long term effects on neurocognition, non-pharmacologic distractions, Michael Jackson's death and medical ethics, the role of simulation in safety and training, and palliative sedation in terminally ill children. The specialty-specific chapters continue to be geared toward all sedation providers regardless of where they practice, and patient safety is again emphasized. Fundamental chapters provide in-depth reviews of topics which include, among others, physiology and pharmacology. The book presents the latest guidelines across the specialties both in the United States and abroad, and noteworthy ongoing research endeavors. From reviews of the First Edition, this meritorious volume is a splendid collection of materials from highly experienced authors. I will make extensive use of this reference as the academic medical center in which I work continues to build sedation practices and assess credentialing/privileging aspects for professionals of all fields. Joseph R. Tobin, MD, in *Journal of the American Medical Association*. Brings together sedation practice from a broad range of specialties into one well-written pediatric text. I will certainly be using this book as a reference text in the future. *Pediatric Anesthesia*. The first text directed at all specialists that treat children who require some sedation also recognizes the contributions to pediatric sedation of many international societies and governmental organizations. It should be on the shelves of all office-based practices. *Journal of Neurosurgical Anesthesiology*. With the ever-increasing opportunities to perform various investigations and therapeutic procedures combined with increasing demands and expectations from children and their parents, the need and demand for safe and effective sedation of paediatric patients outside the operating room is increasing. Against this background, the second edition of *Pediatric Sedation Outside the Operating Room* is a very timely addition to the anaesthesia literature. *British Journal of Anesthesia*. **Acta fisiológica latino americana**, 1981. **Journal of Medical Engineering & Technology**, 1983. *Anesthesiology*.
