Capacity Development Approaches For Future Megacities:

Capacity Development Bernd Mahrin, 2014 The projects in the Future Megacities programme gain valuable experiences in developing energy efficient standards and urban structures with adequate conditions to treat resources with care and avoid unnecessary emissions To achieve the ambitious objectives it is essential to convince and enable people to take an active part in sustainable development This requires qualification and education efforts at different levels with different target groups and for different topics This volume presents several proven and evaluated capacity building measures Proper workmanship individual responsibility and the ability for personal professional progress are presented in the categories Training Practice and Enabling Local Communities The authors share their experience and inspire people to set up own comparable projects Sustainable Ho Chi Minh City: Climate Policies for Emerging Mega Cities Antje Katzschner, Michael Waibel, Dirk Schwede, Lutz Katzschner, Michael Schmidt, Harry Storch, 2015-12-01

As climate change and urban development are closely interlinked and often interact negatively this edited volume takes Ho Chi Minh City HCMC Vietnam s first mega urban region as a case study to analyse its vulnerability to climate change and to suggest measures towards a more sustainable urban development The book offers an overview on land use planning regarding the aspects of urban flooding urban climate urban energy and urban mobility as well as spatial views from the angle of urban planning such as the metropolitan level the city the neighbourhood and building level It shows that to a significant degree measures dealing with climate change can be taken from the toolbox of sustainable urban development and reflects how institutional structures need to change to enhance chances for implementation given socio cultural and economic constraints This is merged and integrated into a holistic perspective of planning recommendations supporting the municipal government to increase its adaptive capacity The authors are members of a German government funded research project on how to support HCMC s municipal government to adapt to risks related to climate change **Work, Institutions and Sustainable Livelihood**

Virginius Xaxa, Debdulal Saha, Rajdeep Singha, 2017-10-24 The book explores the debates surrounding sustainable livelihood in the neoliberal era effected through transformation of the nature of work and the role of institutions particularly in the Global South By creating gainful work and employment opportunities through formal and informal institutions using progressive instruments and innovations within rural and urban economies livelihood becomes sustainable thereby reducing inequality and increasing resilience among households Based on both theoretical and empirical studies from Asia and Africa the book establishes the relationship between three broad concepts work institutions and sustainable development The content has been divided into three broad sections Rural Economy and Its Transformations Urbanisation and Sustainable Livelihood and Innovations and Instruments of Transformation This book is a valuable resource for scholars of development studies rural and urban studies labour studies besides economics sociology political science and policymaking

Institutional and Social Innovation for Sustainable Urban Development Harald Mieg, Klaus Töpfer, 2013-08-22 Which new

institutions do we need in order to trigger local and global sustainable urban development Are cities the right starting points for implementing sustainability policies If so what are the implications for city management This book reflects the situation of cities in the context of global change and increasing demands for sustainable development The book introduces core findings new methods and international experience related to sustainability innovations and the social transformation of cities synthesizing insights from megacity research sustainability science and urban planning Written by a team of more than fifty leading researchers and practitioners from all five continents it traces general urban transformations and introduces new approaches such as smart growth strategies cross sectoral transdisciplinary urban transition management urbanisation and city synte-gration The book reveals the potential of new networked agencies of sustainability transformation and discusses the role of science institutions in the diffusion and implementation of institutional and social innovations This comprehensive book is of immense value to students researchers and professionals working on issues of sustainable development in environmental programs in human geography planning and the built environment sociology and policy studies institutional economics and environmental politics
