Use of Transportation Asset Management Principles in State Highway Agencies Neal R. Hawkins, 2013 Roadway infrastructure within the United States includes features such as roads bridges signs pavement markings traffic signals support commerce and mobility and is in essence a shared financial public resource worthy of being managed at the highest level of efficiency State departments of transportation DOTs local transportation authorities and federal agencies responsible for the fiscal management of the transportation system have shown a growing interest in advancing the state of practice in managing these critical assets In addition the recent congressional passage of Moving Ahead for Progress in the 21st Century Act MAP 21 Act has established an outcome driven performance tracking approach that will hold states and metropolitan planning organizations accountable for improving the conditions and performance of their transportation assets It will therefore increase agency attentiveness to these vital issues Transportation Asset Management AM is a strategic and systematic process of operating maintaining upgrading and expanding physical assets effectively throughout their life cycle It focuses on business and engineering practices for resource allocation and utilization with the objective of better decision making based on quality information and well defined objectives Advancing AM capabilities and integrating these capabilities across an organization s business units requires self assessment alignment goal setting and support This synthesis of transportation asset management practice among state highway agencies will be a timely resource for agencies to identify their current state of practice and determine where they will direct their AM efforts This synthesis is based on two separate surveys with additional input from practitioners The initial survey requested that participants conduct a self assessment to characterize their agency s AM practices The self assessment results reflect current and future 5 year business practices and the agencies institutional organizational financial and IT environments This survey yielded 18 DOT participant responses see Appendix D Based on the results of the initial survey and input from the Topic Panel a second survey was designed to capture the state of practice and forward looking expectations for the next 3 to 5 years among state DOTs Forty three agencies participated in this second survey p 1
