The Savvy Guide to Home Security John Paul Mueller, 2005 Whether you are planning to design and install a system yourself or work with professionals this book is a valuable tool in securing your home offers coverage of home offices provides interviews with security experts and offers many recommendations on security systems      Operations Security OPSEC Threat Reduction Solutions LLC, A must have tool for enterprise Operations Security OPSEC practitioners or individuals who want to understand how their every day activities generate information that can be used against them and what to do about it TACTIKS are designed to answer four key questions 1 Who are the threats 2 What are their targets 3 What are their hostile tactics 4 What countermeasures will stop them Content includes the following Operations Security Critical Information Open Source Information Observation Based Information Web Based Information Imagery Intelligence Communications Intelligence Trash Intelligence Social Engineering Elicitation Glossary of Terms Acronyms      **To Serve and Protect** Bruce L. Benson, 1998-08-01 Traces the accelerating trend towards privatization in the criminal justice system In contrast to government's predominant role in criminal justice today for many centuries crime control was almost entirely private and community based Government police forces prosecutors courts and prisons are all recent historical developments results of a political and bureaucratic social experiment which Bruce Benson argues neither protects the innocent nor dispenses justice In this comprehensive and timely book Benson analyzes the accelerating trend toward privatization in the criminal justice system In so doing To Serve and Protect challenges and transcends both liberal and conservative policies that have supported government's pervasive role With lucidity and rigor he examines the gamut of private sector input to criminal justice from private sector outsourcing of prisons and corrections security arbitration to full private justice such as business and community imposed sanctions and citizen crime prevention Searching for the most cost effective methods of reducing crime and protecting civil liberties Benson weighs the benefits and liabilities of various levels of privatization offering correctives for the current gridlock that will make criminal justice truly accountable to the citizenry and will simultaneously result in reductions in the unchecked power of government      *Effective Physical Security* Lawrence J. Fennelly, 2013-10-22 Vulnerability assessment and target hardening encompass very important components of the crime and loss prevention field This book written by a collection of specialists in the field contains a wealth of practical immediately useful information Lawrence J Fennelly is an independent security consultant in Cambridge Massachusetts A graduate of the National Crime Prevention Institute Mr Fennelly is a member of the International Society of Crime Prevention Practitioners and the American Society of Industrial Security He is the author of numerous books on security and crime prevention easy reference text written by specialists in the field      **Home Safety & Security** Time-Life Books, 1990      **The Enterprise of Law** Bruce L. Benson, 2011-07-01 Defenders of the state's monopoly on lawmaking and law enforcement typically assume that any alternative arrangement would favor the rich at the expense of the poor or would lead to the collapse of social order

and ignite a war Questioning how well these beliefs hold up to scrutiny this book offers a powerful rebuttal of the received view of the relationship between law and government The provision of justice and security has long been linked in most people s minds to the exclusive province of government monopolies However in this path breaking book Benson shows that a system of market based institutions rooted in the legal principle of personal accountability under a rule of law in all aspects of criminal justice have and can deliver those services on their own without the aid of taxation and a coercive state monopoly on the establishment and enforcement of law In *The Enterprise of Law* Benson offers a powerful rebuttal of the received view of the relationship between law and government The book brilliantly shows that non state institutions have and do fight crime resolve disputes and render justice more effectively than the state because they have stronger incentives to do so The book offers a host of landmark findings and here is just a sampling The rapid recent growth of private sector security and conflict resolution continues the effective legacy of private crime control and the common law Protections for individual rights and private property are not the exclusive purview of government run legal systems Privatizing security and dispute resolution services and contracting out to the private sector can offer tangible benefits namely better and more just services at lower costs
