If you are not sure of the installation of any part of the quick start guide, please download the complete installation manual available at www.autopageusa.com. This quick start guide is a brief outline for professional installers that are familiar with the installation and operation of the remote start system. Please test all of your equipment to insure proper operation of the vehicle system returning to the customer.

For additional technical support, please call 800-888-8888 and visit our website www.autopageusa.com through following from 8:00 to 5:00 Pacific Standard Time.

The Remote Starter with Remote Entry System has been designed to be installed on Transponder systems with an external transmitter (DS-434).

1. Mount the unit where there is a remote transponder system.

The system must be installed and tested through a safety switch so it will not start in any forward or reverse gear.

Some automatic transponder vehicles having other DS-434 vehicles with a remote starter may have a mechanical key port, safety switch instead of electrical safety switch. The mechanical key does not interrupt the starter circuit when the transponder is in any gear and does not allow the 100% level of safety required for remote starting operation. Therefore, our system should never be installed on any vehicle that uses a mechanical key port safety switch.

Once you install the system, you must verify that the vehicle will not start in any forward or reverse gear regardless of the type of vehicle.

2. Mount the system where there is a remote transponder system that can properly complete the installation. There is a possibility that the system cannot be installed on some automatic transponder vehicles.

3. Some vehicles have an I/O or any system, the vehicle can start and do not provide any level of the DS-434 system.

4. Disconnect the air battery before beginning work on the vehicle.

Check battery polarity before wiring any cables. Ensure that no wiring terminals or other components are located between the points that would otherwise be damaged.

5. Do not use conventional jump lead, battery or any wiring that wiring, i.e. repair parts will possibly obstruct connectivity into the start system and may result in false alarm or incorrect operation. The suggested following of connection points.

6. Install the wiring neatly under carpets or under wire to prevent possible damage to wires.
