

LCD display elements

The PM 230 electricity meter is a monitoring and testing instrument with which it is possible to determine the power consumption of a connected appliance and the cost of the electricity consumed.

Installing the batteries

Before the instrument is used, two 1.5 V dry-cell batteries must be fitted, type LR 44, V 13 GA, RW 82 or similar. Remove the battery compartment from the back of the instrument and install the two batteries in accordance with the polarity symbols in the compartment. Installing the batteries the wrong way round may damage the instrument.

The purpose of the batteries is to store the metered amounts and programmes.

Resetting

If an abnormal display appears or the buttons produce no response, the instrument must be reset. To do this, press the RESET button with a round object, e.g. a ballpoint pen or straightened paper clip. This will delete all the programmes from the instrument memory.

Setting the clock

In the clock mode, the present time is displayed. To adjust the time, proceed as follows.

First, press the SET button once; this causes the *Day* sign to flash. Pressing the CHANGE button once raises the number in increments of 1. Confirm your input with the SET button.

Now the *Hour* value starts flashing. Pressing the CHANGE button once raises this value by increments of 1. Confirm your input with the SET button.

Now the *Minute* value starts flashing. Pressing the CHANGE button once raises this value by increments of 1. Confirm your input with the SET button.

Now the *Second* value starts flashing. Press the CHANGE button once to set this value to 0. Confirm your input with the SET button; this concludes the clock setting procedure.

The instrument will leave every setting mode if no key is pressed for one minute.

12- or 24-hour display mode

The instrument offers a choice of 12-hour (with PM) or 24-hour display (0-23). To transfer from one mode to the other, press the SET button in the clock mode and hold down for 5 seconds.
