Compelling Convictions Terry L. Brensinger, Jennifer Lancaster, Alan Robinson, 2024-06-25 A fresh look at our core values In the twenty years since a group of Brethren in Christ pastors educators administrators and laypeople first met to identify ten core values for the North American church much has changed including the continuing decline of the church in the west dynamic social movements for racial gender and economic justice vast advances in technology and a worldwide pandemic With so much happening on both the national and international stages it seems vital that we as Brethren in Christ prayerfully reflect not only on our core values and their application but on how those values might help our churches engage a dramatically new social context Are these values merely sentimental slogans Or do they constitute compelling convictions genuine guiding lights orienting us and motivating our mission in a rapidly changing world The answer to that all important question depends largely on how we use them In this forward looking book essays from Brethren in Christ pastors and leaders from across the globe call us into the future of the church to unleash our creative energies roll up our sleeves and put these core values to good use Climate Justice and Community Renewal Brian Tokar, Tamra Gilbertson, 2020-03-31 This book brings together the voices of people from five continents who live work and research on the front lines of climate resistance and renewal The many contributors to this volume explore the impacts of extreme weather events in Africa the Caribbean and on Pacific islands experiences of life long defenders of the land and forests in Brazil India Indonesia and eastern Canada and efforts to halt the expansion of fossil fuel infrastructure from North America to South Africa They offer various perspectives on how a just transition toward a fossil free economy can take shape as they share efforts to protect water resources better feed their communities and implement new approaches to urban policy and energy democracy Climate Justice and Community Renewal uniquely highlights the accounts of people who are directly engaged in local climate struggles and community renewal efforts including on the ground land defenders community organizers leaders of international campaigns agroecologists activist scholars and many others It will appeal to students researchers activists and all who appreciate the need for a truly justice centered response to escalating climate disruptions **Making Sense of Narrative Text** Michael Toolan, 2016-06-03 This book takes the following question as its starting point What are some of the crucial things the reader must do in order to make sense of a literary narrative The book is a study of the texture of narrative fiction using stylistics corpus linguistic principles especially Hoey s work on lexical patterning narratological ideas and cognitive stylistic work by Werth Emmott and others Michael Toolan explores the textual grammatical nature of fictional narratives critically re examining foundational ideas about the role of lexical patterning in narrative texts and also engages the cognitive or psychological processes at play in literary reading The study grows out of the theoretical questions that stylistic analyses of extended fictional texts raise concerning the nature of narrative comprehension and the reader s experience in the course of reading narratives and particularly concerning the role of language in that comprehension and

experience The ideas of situation repetition and picturing are all central to the book's argument about how readers process story and Toolan also considers the ethical and emotional involvement of the reader developing hypotheses about the text linguistic characteristics of the most ethically and emotionally involving portions of the stories examined This book makes an important contribution to the study of narrative text and is in dialogue with recent work in corpus stylistics cognitive stylistics and literary text and texture

Post-Western Histories of Architecture Pilar Maria Guerrieri, Marco Biraghi, 2023-06-23 This book seeks to provide an alternative post Western perspective to the history of contemporary architecture It puts forward detailed critical analyses of various areas of the world including Europe Latin America Africa China Australia India and Japan where particular movements of architecture have developed as active political acts The authors focus on a broad spectrum of countries architectures and architects that have developed a design approach closely linked to the building context The concept of context is broad and includes various economic social cultural

political and natural aspects In all cases the architects selected in this book have chosen to view context as an opportunity However each architect has considered certain specific aspects of context some have been very attentive to the social context others to material aspects or typological issues and still others to aspects related to political visions or economic factors The analysis critically highlights interesting creative and respectful design approaches towards local conditions such as sustainability in Nordic Europe climate conscious design in Africa and the bottom up sensitivity of India The book s main aim is to retrace through both theoretical arguments and case studies the debate that focuses on politics and the environment Thanks to its valuable examples this book strives to make a conscious contribution to establishing a bulwark against the current flattening out processes that architecture is experiencing This book will be of relevance to researchers teachers and students interested in the history of architecture architecture and planning and postcolonial studies

Indigenous Celebrity
Jennifer Adese, Robert Alexander Innes, 2021-04-09

Indigenous Celebrity speaks to the possibilities challenges and consequences of popular forms of recognition critically recasting the lens through which we understand Indigenous people s entanglements with celebrity It presents a wide range of essays that explore the theoretical material social cultural and political impacts of celebrity on and for Indigenous people It questions and critiques the whitestream concept of celebrity and the very juxtaposition of Indigenous and celebrity and casts a critical lens on celebrity culture s impact on Indigenous people Indigenous people who willingly engage with celebrity culture or are drawn up into it enter into a complex terrain of social relations informed by layered dimensions of colonialism racism sexism homophobia transphobia and classism Yet this reductive framing of celebrity does not account for the ways that Indigenous people s own worldviews inform Indigenous engagement with celebrity culture or rather popular social and cultural forms of recognition Indigenous Celebrity reorients conversations on Indigenous celebrity towards understanding how Indigenous people draw from nation specific processes of respect and recognition while at the same time navigating external assumptions and expectations This collection examines the relationship of Indigenous people to the concept of celebrity in past present and ongoing contexts identifying commonalities tensions and possibilities
