supplementary ideas and homework sheets **GCSE Mathematics - A Pocket Guide for Re-takers and Adults** Mick Price, 2024-05-24 As its title suggests this book has been devised by author Mick Price as an essential guide for those revisiting Mathematics at GCSE level. Crafted from years of experience and class tested materials it serves as a unique revision tool tailored for both FE college students and adults seeking to improve their previous grades or refresh long forgotten knowledge. Stripping back the complexities of mathematics this book focuses on the fundamentals needed to achieve a grade 4 without overwhelming its readers with the entirety of KS4 content. GCSE Mathematics promises accessibility and convenience making it an indispensable companion for both classroom learning and self study. Inside you will find a blend of theoretical essentials, practical real life examples and exercises designed for both younger and more mature learners all presented in a straightforward uncondescending manner. GCSE Mathematics is not just a book it's a tool for success always within reach **What is a Mathematical Concept?** Elizabeth de Freitas, Nathalie Sinclair, Alf

Coles, 2017-06-22 Responding to widespread interest within cultural studies and social inquiry this book addresses the question what is a mathematical concept using a variety of vanguard theories in the humanities and posthumanities. Tapping historical, philosophical, sociological and psychological perspectives each chapter explores the question of how mathematics comes to matter. Of interest to scholars across the usual disciplinary divides this book tracks mathematics as a cultural activity drawing connections with empirical practice. Unlike other books in this area it is highly interdisciplinary devoted to exploring the ontology of mathematics as it plays out in different contexts. This book will appeal to scholars who are interested in particular mathematical habits, creative diagramming, structural mappings, material agency, interdisciplinary coverings that shed light on both mathematics and other disciplines. Chapters are also relevant to social sciences and humanities scholars as each offers philosophical insight into mathematics and how we might live mathematically.

Parliamentary Debates (Hansard). Great Britain. Parliament. House of Commons, 2010 **Teaching Mathematics** Pamela Cowan, 2006-02-13 Practical advice for teachers of Mathematics at the beginning of their careers in primary or secondary schools with guidance on effective teaching, classroom practice and career development School Accountability Great Britain. Parliament. House of Commons. Children, Schools and Families Committee, 2010 This report considers the roles of a variety of different agents for accountability in the English school system. The first part examines self evaluation, self improvement, partners and local authorities. Schools have increasingly been encouraged to formalise the self evaluation process as part of their improvement strategy. They are assisted in their self evaluation and improvement processes by School Improvement Partners (SIPs) who are appointed by the local authority. School provision is commissioned by local authorities who also have a remit to monitor local schools' performance. The report then focuses on the work of Ofsted. School inspection reports are a major source of information about a school's performance and inspection is often the trigger for a school to address its performance issues. The report then looks at the Achievement and Attainment Tables formerly known as

performance tables The tables have been the subject of controversy for many years because although they do not actually rank schools according to their performance in national examinations they permit others especially the media to do so Critics argue that they give only a partial view of a school's overall performance and the proposed School Report Card is an attempt to address this issue by providing more information on a wider range of performance indicators The school accountability process has become very complex with new programmes and policies emerging piecemeal from central government There are concerns about the consistency of approach in such a complex system And are schools really free to drive their own improvement given that they are still subject to programmes devised and applied by central government
