Egerton University 2015 Intake Engineering:

Tropentag 2015 Eric Tielkes, 2015-09-01 Large quantities of water are appropriated to produce the feed annually consumed in global livestock production. Rising concerns about increasing competition for water resources and projected increase in demand for livestock products make it imperative to look for strategies to sustainably increase livestock production with water being one key natural resource to consider. Using a combination of different datasets a mechanistic livestock model and a dynamic vegetation model we estimate the annual consumptive water use CWU in the global livestock sector associated with crops and fodder cultivated on cropland and grazed biomass from pastures. *Thus Until* Emilia Ilieva, Reuben Matheka, 2025-08-04 *Thus Until* A History of Egerton University is a thorough historical chronological and well researched account of Egerton University from a whites only college when it started in 1939 through to the expansion it has experienced over the years culminating in being a full university. More than any other university in Kenya Egerton has a long and colourful history but like all the other universities it has suffered from the political economic and financial challenges of the time especially since the double intake of the 1990s. Chapter One provides the required background to the study highlighting agricultural and educational policies and steering away from the Happy Valley hype so characteristic of the period. The reader will learn about the Egerton family in Chapter Two and particularly about Lord Egerton himself and the colonial circumstances within which he lived. The chapter dispels some of the popularly held myths about him. Chapter Three deals with the beginnings of the college and the various structural and curriculum experiments tried out and the kind of enrolment and students it experimented with as an all white establishment. The chapter ends with Africans beginning to agitate for change. With great attention to detail the later chapters put the university in a broader local and international context thereby increasing its relevance to society. A History of Egerton University though heavily footnoted and with a detailed bibliography is written in a simple easy flowing and accessible style. **Biotechnologies for Wastewater Treatment and Resource Recovery** Arun Lal Srivastav, Inga Zinicovscaia, Liliana Cepoi, 2024-11-07 *Biotechnologies for Wastewater Treatment and Resource Recovery* Current Trends and Future Scope presents up to date insights on the water crisis stemming from wastewater production.
