### **Process Standards: The Nature of Science and the Design Process**

- *Analyze data using the scientific method.*
- *Form logical conclusion based on cause and effect using experimental data.*
- *Compare conclusions to existing theories.*
- *Recognize need for additional study/data.*

#### **The Nature of Science**

- Make predictions and develop testable questions based on research and prior knowledge.
- Plan and carry out investigations as a class, in small groups or independently off a period of several class lessons.
- Collect quantitative data with appropriate tools or technologies and use appropriate units to label numerical data.
- Incorporate variables that can be changed, measured or controlled.
- Use the principles of accuracy and precision when making measurement.
- Test predictions with multiple trials
- Keep accurate records in a notebook during investigations.
- Analyze data, using appropriate mathematical manipulation as required, and use it to identify patterns and make inferences based on these patterns.
- Evaluate possible causes for differing results (valid data).
- Compare the results of an experiment with the prediction.
- Communicate findings using graphs, charts, maps and models through oral and written reports.

#### **The Design Process**

- Identify a need or problem to be solved.
- Brainstorm potential solutions.
- Document the design throughout the entire design process so that it can be replicate in a portfolio/notebook with drawings including labels.
- Select a solution to the need or problem.
- Select the most appropriate materials to develop a solution that will meet the need.
