Egerton University Application Form 2014:

Thus Until Emilia Ilieva, Reuben Matheka, 2025-08-04 Thus Until A History of Egerton University is a thorough historical chronological and well researched account of Egerton University from a whites only college when it started in 1939 through to the expansion it has experienced over the years culminating in being a full university More than any other university in Kenya Egerton has a long and colourful history but like all the other universities it has suffered from the political economic and financial challenges of the time especially since the double intake of the 1990s Chapter One provides the required background to the study highlighting agricultural and educational policies and steering away from the Happy Valley hype so characteristic of the period The reader will learn about the Egerton family in Chapter Two and particularly about Lord Egerton himself and the colonial circumstances within which he lived The chapter dispels some of the popularly held myths about him Chapter Three deals with the beginnings of the college and the various structural and curriculum experiments tried out and the kind of enrolment and students it experimented with as an all white establishment The chapter ends with Africans beginning to agitate for change With great attention to detail the later chapters put the university in a broader local and international context thereby increasing its relevance to society A History of Egerton University though heavily footnoted and with a detailed bibliography is written in a simple easy flowing and accessible style *Judicial Bricolage* Tania Groppi, Marie-Claire Ponthoreau, Irene Spigno, 2025-02-06 This book represents a unique contribution to comparative legal studies by presenting the results of an empirical research project on the use of foreign precedents in constitutional interpretation in 31 jurisdictions worldwide It expands and updates the outcomes presented in the previous successful book *The Use of Foreign Precedents by Constitutional Judges* edited by Tania Groppi and Marie Claire Ponthoreau and published in 2013 as Volume 1 of the series *Hart Studies in Comparative Public Law* This new research covering countries from all the continents with special attention to some of the emerging jurisdictions of the Global South confirms that the practice of making explicit use of foreign precedents is still limited both quantitatively and qualitatively Judicial dialogue only exists in common law jurisdictions and even there judicial bricolage is much more common than judicial comparativism Since the previous edition this practice has gone hand in hand with new developments in constitutional law such as the democratic erosion and backsliding the emergence of populist movements the increasing role of regional human rights courts which in many cases overshadowed foreign sources and the end of a global vision of constitutionalism Applying a quantitative and a qualitative analysis with the support of tables and data the book gives a more complete picture of the practice of citing foreign precedents in this new and challenging era resulting in essential reading for comparative and constitutional legal scholars *Enhancing Food Production System Resilience for Food Security Facing a Changing Environment* Liming Ye, Ping Zhu, 2023-11-28 As the dominant source of the human food supply the global land system underlies the foundation of the livelihood and wellbeing of humanity on Earth On the one hand the growth rate in the land system s productive capacity

of food has played a key role in global food provision Technological breakthroughs in wheat and rice production during the past few decades for instance have greatly contributed to the maintenance of this growth rate in many parts of the world On the other hand however the terrestrial food production system is facing increasing challenges from environmental stressors ranging from climate change air pollution to land degradation Whether and how the global land system will support the food security of more than 10 billion people in the 21st century while minimizing its environmental footprint remains an open question to debate It is inevitable that the global food production system has to be shifted from focusing on production expansion to land system resilience so that the dual goals of sustainable production and environmental friendliness can be simultaneously achieved
