Williams, 2013-10 A Complete Author Marketing Course If you are self published have several books available and you've learned that it's not as easy as they say to make money with Kindle then chances are that you are spending more and more time marketing than you spend writing and that's not good You've probably bought the Publishing Bible books by Tom Corsen Knowles read John Tighe and his Crush it with kindle studied Derek Doepker and his Kindle Bestseller Secrets and maybe read John Locke with his story of selling a million ebooks They are all very fine books The idea with becoming a writer is that you build a passive income right That's possibly why you started writing in the first place Passive Income should be income where you don't have to spend the rest of your life marketing When that happens you are back to trading time for money and that's not passive is it The twist with this series is that it will help you put in place not just passive income but passive book marketing too If you get the marketing right first time then there's little else to do but write more content and that's what you really need to build that income you deserve Sure you will have to do some marketing in the future but the idea is that you get it right the first time systematize the marketing and then move on So what are your options Do nothing continue along as you are now and just keep increasing your marketing workload Learn all of this yourself through trial and error Try this book series and take a shortcut This book gives you the latest and best advice possible when it comes to book marketing It will give you the best of those tips that you have heard about elsewhere coupled with new ideas and thoughts all backed with testing I haven't sold a million books yet but unlike the other authors of kindle marketing books I come from a professional sales If you get this part right then you will never have to go through major changes again How many times have

you changed your books so far A little of what you will learn How do the Amazon algorithms work What are the factors that influence them The work you must do to optimize your books for success A proven formula called SPEVOS for putting together a powerful sales message How to force your readers to join your mailing list Author Central vs KDP Editor after the Nov 2013 changes Reviews and how to get them Increase your kindle book sales using psychology What content should be included in every book that you write Pricing strategies Much More Included with the book are supporting documents spreadsheets and checklists to track your efforts This first book in the series will form the foundation of your author marketing plan It s comprehensive detailed and most importantly proven to work Take A Look Inside Before you buy this book take a look inside at the first chapter by clicking the image at the top of the page Amazon Prime Members Borrow this book for FREE

**Programming Methodologies** Mem Lnc,Rufus Stewart,2020-10-11 When programs are developed to solve real life problems like inventory management payroll processing student admissions examination result processing etc they tend to be huge and complex The approach to analyzing such complex problems planning for software development and controlling the development process is called programming methodology This book discusses issues pertinent to producing all high quality software and in particular issues pertinent primarily to producing software designed to resist attack Both application and system level software are considered Although there are differences between how the two are produced the similarities dominate the differences Of the several factors that govern the difficulty of producing software one of the most important is the level of quality to be attained as indicated by the extent to which the software performs according to expectations High quality software does what it is supposed to do almost all the time even when its users make mistakes For the purposes of this study software is classified according to four levels of quality exploratory production quality critical and secure These levels differ according to what the software is expected to do its functionality and the complexity of the conditions under which the software is expected to be used environmental complexity Exploratory software does not have to work the chief issue is speed of development Although it has uses exploratory software is not discussed in this report Production quality software needs to work reasonably well most of the time and its failures should have limited effects For example we expect our spreadsheets to work most of the time but are willing to put up with occasional crashes and even with occasional loss of data We are not willing to put up with incorrect results Critical software needs to work very well almost all of the time and certain kinds of failures must be avoided Critical software is used in trusted and safety critical applications for example medical instruments where failure of the software can have catastrophic results In producing critical software the primary worries are minimizing bugs in the software and ensuring reasonable behavior when nonmalicious users do unexpected things or when unexpected combinations of external events occur Producing critical software presents the same problems as producing production quality software but because the cost of failure is higher the standards must be higher In producing critical software the goal is to decrease risk not to decrease cost
