**Pedagogy and Prescribed Capabilities** Charusheel Tripathi, 2025-02-11 This book questions the validity and reliability of conventional measures of quality education such as enrolment ratio retention rates pupil teacher ratio drop out rates learning outcomes of children in foundational literacy and arithmetic and availability of infrastructural facilities henceforth demanding its re calibration It moves away from easily commensurable indicators and actively pursues descriptive indicators of quality which directly focus on educational processes taking place within the classroom and the factors influencing them By interacting with the two primary stakeholders i e teachers and students this book draws a link between what is happening within classrooms vis vis the macro level governmental policies The strength of the book lies in its methodological approach to understanding whether students and teachers are able to actualize their capabilities as pledged to them under official educational programmes By doing so the author deems to alter the narrative of how quality of education is visualized hoping that these revelations have developmental implications for not only India but also the entire international community engaging with the questions of what and how of quality in school education In a nutshell the book endeavours to find out how teachers and students fare in terms of realization of their prescribed capabilities This book would be useful to students researchers and teachers working in the fields of education psychology development studies policy studies social work and sociology It would also be an invaluable companion to policymakers and professionals from governmental and non governmental organizations working in education and social development
