| m | Liquid nitrogen | <p>The use of liquid nitrogen allows exciting and thought-provoking demonstrations but there are significant hazards, the risks from which must be controlled. They are:</p> <ul style="list-style-type: none">• asphyxiation in oxygen-deficient atmospheres;• fire in oxygen-enriched atmospheres;• cold burns, frost bite & hypothermia from the intense cold;• over-pressurisation from the large volume expansion of the liquid;• manual-handling accidents if using large (25 litre) volumes. <p>There are also risks associated with the transport of liquid nitrogen.</p> |
| m | Asphyxiation in oxygen-deficient atmospheres | <p>Small amounts (not exceeding 2 litres) of liquid nitrogen can be safely used in school laboratories, without risk of asphyxiation. It would be prudent to ensure good ventilation. However, if liquid nitrogen is kept in preparation rooms, stores and other confined spaces, these must be ventilated as much as possible. In the event of a spill in a confined space, the room should be evacuated. If liquid nitrogen has been kept in a confined space, when retrieving it, a second person should be present in case of asphyxia.</p> |
| m | Fire in oxygen-enriched atmospheres | <p>The boiling point of oxygen is -183°C, higher than that of nitrogen, -196°C. Liquid nitrogen may condense liquid oxygen from the surrounding air. Substances will burn more fiercely and ignite. Provided that the quantities of liquid nitrogen are small (eg, 2 litres) there is not much risk of significant oxygen enrichment. Never leave a test tube, or any other container surrounded by liquid nitrogen, for long periods.</p> |
| m | Cold burns, frost bite and hypothermia from the intense cold | <p>When handling liquid nitrogen, eye protection (preferably goggles or a face shield) must be worn as well as non-absorbent, leather gloves. Shoes and gloves need to be easily removable but open-toed shoes should not be worn. Demonstrators need to be vigilant about the possibility of splashes of liquid nitrogen becoming entrapped in clothing, etc.</p> |
| m | Over-pressurisation from the large volume expansion of the liquid | <p>2 litres of liquid nitrogen will become 1366 litres of gaseous nitrogen. In an enclosed vessel this will give rise to a huge increase in pressure. Because liquid nitrogen is cold, it will condense any moisture in the atmosphere, possibly forming an ice plug which may seal an open vessel, causing the pressure to build up. To our knowledge this has caused at least two explosions in schools/colleges. Liquid nitrogen must be transported, kept and used only in a vented Dewar flask, specially designed for cryogenic work. Do not, under any circumstances, use ordinary vacuum flasks. (Suitable small Dewars are available for less than £100 (2005 prices), eg, from Camlab.</p> |
| m | Transport of liquid nitrogen | <p>Under the <i>Transportable Pressure Vessels Regulations</i>, liquid nitrogen must only be transported in vessels which are suitable for this purpose (see above). Open vessels are not suitable, because of the risk of splashing and spills.</p> <p>If liquid nitrogen is transported by road, the <i>Carriage of Dangerous Goods and Use of Transportable Pressure Equipment Regulations</i> require that the driver shall have had special training. The BCGA Code of Practice CP30 <i>The Safe Use of Liquid Nitrogen Dewars up to 50 litres</i> (British Compressed Gases Association, 2000) states that Dewars must be transported separately from driver or passengers. Flat-back pick-ups, trailers or vehicles fitted with a separating bulkhead should be used. These two requirements mean it is unlikely that schools will be able to obtain free supplies from a</p> |

CLEAPSS Laboratory Handbook CLEAPSS School Science Service, Aspects of Teaching Secondary Science Sandra Amos, Richard Boohan, 2003-09-02 This book's structure reflects the different dimensions to learning science. The first section focuses on the importance of talk in the science classroom while the second explores the key role of practical work. The third section is concerned with the creative theoretical aspect of science. Section four follows this by considering the communication of ideas and how pupils learn to participate in the discourse of the scientific community. Section five emphasizes the place of science in the broader context considering its moral and ethical dimensions and its place in a cultural context. Finally, section six explores the complexity of the task faced by science teachers highlighting the knowledge and skills science teachers must acquire in order to create an environment in which students are motivated to learn science.

Midwest Paracetamol Frank Ellis, 2002 First made in the late 19th century, paracetamol is now widely used in a variety of pharmaceutical products. General Chemistry Laboratory Manual and Notebook Philip Borer, 2019-05-28 **Laboratory Manual of Physical Chemistry (Classic Reprint)** Albert Watson Davison, 2017-09-16 Excerpt from Laboratory Manual of Physical Chemistry In view of the fact that there are as a rule available for laboratory work not more than two and one half hours at a time it has been found desirable to have the different pieces of apparatus set up beforehand by the instructor To this end each experiment is preceded by an exact list of the apparatus and chemicals needed It is believed that this will materially aid the instructor in assembling the necessary equipment At the Rensselaer Polytechnic Institute the laboratory course immediately follows the completion of the theoretical course in physical chemistry and students are thus prepared to take up the study of any experiment herein listed It is therefore found practical to prepare the equipment for one or two units of each exercise before the laboratory course starts and to shift the student successively from one experiment to another In this way an excessive amount of preparatory work is avoided Many of the experiments have been in use in their present form at this Institute and elsewhere for a number of years and have been found to be thoroughly satisfactory About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of
