Climate Change Review Draft Report:

Review of the Draft Fourth National Climate Assessment National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Division on Earth and Life Studies, Board on Environmental Change and Society, Board on Atmospheric Sciences and Climate, Committee to Review the Draft Fourth National Climate Assessment, 2018-05-18 Climate change poses many challenges that affect society and the natural world. With these challenges however come opportunities to respond. By taking steps to adapt to and mitigate climate change the risks to society and the impacts of continued climate change can be lessened. The National Climate Assessment coordinated by the U.S. Global Change Research Program is a mandated report intended to inform response decisions. Required to be developed every four years, these reports provide the most comprehensive and up-to-date evaluation of climate change impacts available for the United States, making them a unique and important climate change document. The draft Fourth National Climate Assessment (NCA4) report reviewed here addresses a wide range of topics of high importance to the United States and society more broadly, extending from human health and community well-being to the built environment to businesses and economies to ecosystems and natural resources. This report evaluates the draft NCA4 to determine if it meets the requirements of the federal mandate, whether it provides accurate information grounded in the scientific literature, and whether it effectively communicates climate science impacts and responses for general audiences, including the public, decision makers, and other stakeholders.

Review of the Draft Interagency Report on the Impacts of Climate Change on Human Health in the United States National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Board on Population Health and Public Health Practice, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Committee to Review the Draft Interagency Report on the Impacts of Climate Change on Human Health in the United States, 2015-08-24 The U.S. National Climate Assessment identified a number of ways in which climate change is affecting and is likely to affect people, infrastructure, natural resources, and ecosystems. Those impacts in turn are increasingly having important current and potential future consequences for human health. There is a need to probe more deeply into how climate change impacts on the environment can create environmental stressors that in turn are having and/or have the potential to have significant impact on human health in a number of dimensions. In response to this need, the U.S. Global Change Research Program (USGCRP) has initiated an interagency Scientific Assessment on the Impacts of Climate Change on Human Health in the United States. The Assessment is intended to inform public health authorities, other planning and policy entities, and the general public. Review of the Draft Interagency Report on the Impacts of Climate Change on Human Health in the United States evaluates the scientific basis, findings, and key messages of the USGCRP Draft Assessment. This report offers a number of overarching suggestions on how the USGCRP report authors can enhance their identification and assessment of the science and better communicate their conclusions to all of their target audiences. These

recommendations this help the Assessment to play a significant role in continued efforts to examine and explore the impacts of climate change on human health

Climate Change A Barrie Pittock,2009-03-31 It is widely accepted in the scientific community that climate change is a reality and that changes are happening with increasing rapidity In this second edition leading climate researcher Barrie Pittock revisits the effects that global warming is having on our planet in light of ever evolving scientific research Presenting all sides of the arguments about the science and possible remedies Pittock examines the latest analyses of climate change such as new and alarming observations regarding Arctic sea ice the recently published IPCC Fourth Assessment Report and the policies of the new Australian Government and how they affect the implementation of climate change initiatives New material focuses on massive investments in large scale renewables such as the kind being taken up in California as well as many smaller scale activities in individual homes and businesses which are being driven by both regulatory and market mechanisms The book includes extensive endnotes with links to ongoing and updated information as well as some new illustrations While the message is clear that climate change is here and in some areas might already be having disastrous effects there is still hope for the future and the ideas presented here will inspire people to take action

Climate Change The Science Impacts and Solutions is an important reference for students in environmental or social sciences policy makers and people who are genuinely concerned about the future of our environment

Climate Change and Social Justice Jeremy Moss,2009-06-16 The impacts of climate change can already be felt in society and on the Earth itself As new evidence of the environmental impact of climate change is constantly emerging we are forced to confront the significance of our political decisions about who will pay the price of responding to a changing climate In the rush to avoid or reduce the repercussions of climate change we need to ensure that the burden is evenly distributed or run the risk of creating injustice

Climate Change and Social Justice demonstrates that the problem of how to distribute the costs of climate change is fundamentally a problem of justice If we ignore the concerns addressed this book the additional burdens of climate change will fall on the poor and vulnerable

Jeremy Moss brings together today s key thinkers in climate research including Peter Singer Ross Garnaut and David Karoly to respond to these important issues

Targets and Trajectories Ross Garnaut,2008

Review of the Draft Climate Science Special Report National Academies of Sciences, Engineering, and Medicine,Division on Earth and Life Studies,Board on Atmospheric Sciences and Climate,Committee to Review the Draft Climate Science Special Report,2017-05-30 The United States Global Change Research Program USGCRP is moving towards a sustained assessment process that allows for more fluid and consistent integration of scientific knowledge into the mandated quadrennial National Climate Assessment As part of this process the USGCRP is developing the Climate Science Special Report CSSR a technical report that details the current state of science relating to climate change and its physical impacts The CSSR is intended to focus on climate change in the United States and to inform future USGCRP products

Review of the Draft Climate Science Special Report assesses whether the draft CSSR accurately presents the scientific literature in

an understandable transparent and traceable way whether the CSSR authors handled the data analyses and statistical approaches in an appropriate manner and the effectiveness of the report in conveying the information clearly for the intended audience This report provides recommendations for how the draft CSSR could be strengthened **World Climate Report**, 1995 **Federal Register**, 2014-02 **Review of the Draft Fifth National Climate Assessment** National Academies of Sciences Engineering and Medicine, Division of Behavioral and Social Sciences and Education, Division on Earth and Life Studies, Board on Environmental Change and Society, Board on Atmospheric Sciences and Climate, Committee to Review the Draft Fifth National Climate Assessment, 2023-12-20 Roughly every four years the U S Global Change Research Program produces a congressionally mandated assessment of global change science and the impacts adaptation and mitigation of climate change in the United States The draft Fifth National Climate Assessment NCA5 released publicly in November 2022 covers a wide range of U S impacts from human health and community well being to the built environment businesses and economies and ecosystems and water resources NCA5 had the largest scale of collaboration to date in the series with input from hundreds of experts from all levels of governments academia non government organizations the private sector and the public The National Academies report provides an independent comprehensive review and makes recommendations to strengthen the accuracy credibility and accessibility of the draft NCA5 report The National Academies review of the draft NCA5 report finds that it successfully meets the requirements of the federal mandate provides accurate information and effectively communicates climate science to the public decision makers and other stakeholders The review makes recommendations for ways the draft NCA5 report could be strengthened including adopting more clear and consistent structure for key messages and figures across the report resolving inconsistencies between chapters in how terms and topics are discussed for example the use of scenarios and projections intentionally applying an equity and justice lens across chapters and increasing emphasis on certain topical areas The Journal of Australian Political Economy, 2007
