

**CHAPTER 10 Section 1** (pages 342–345)

# Imperialism and America

## BEFORE YOU READ

In the last section, you read about Woodrow Wilson.

In this section, you will learn how economic activity led to political and military involvement overseas.

## AS YOU READ

Use this web diagram to take notes. Fill it in with details about the causes of U.S. imperialism.

### TERMS AND NAMES

**Queen Liliuokalani** The Hawaiian queen who was forced out of power by a revolution started by American business interests

**imperialism** The practice of strong countries taking economic, political, and military power over weaker countries

**Alfred T. Mahan** American imperialist and admiral who urged the United States to build up its navy and take colonies overseas

**William Seward** Secretary of state under Presidents Lincoln and Johnson

**Pearl Harbor** Naval port in Hawaii

**Sanford B. Dole** American businessman who became president of the new government of Hawaii after the queen was pushed out.

## American Expansionism

(pages 342–344)

### Why did Americans support imperialism?

In 1893, **Queen Liliuokalani** of Hawaii gave up her throne. Hawaii was about to be taken over by the United States.

By the 1880s, many American leaders thought the United States should establish colonies overseas. This idea was called **imperialism**—the policy in which stronger nations extend economic, political or military control over weaker territories. European countries had competed for territory all over the world. Most Americans gradually accepted the idea of overseas expansion.

Three factors fueled American imperialism: desire for military strength, thirst for new markets, and a belief in the superiority of American culture.

Admiral **Alfred T. Mahan** of the U.S. Navy supported growing American naval power so the U.S. could compete with other nations. The U.S. built such modern battleships as the *Maine* and the *Oregon*. The new ships made the U.S. the world's largest naval power.

By the late 1800s, *technology* had changed American farms and factories. They produced more than Americans could consume. So the U.S. needed foreign trade. American businesses needed markets for their products and raw materials for their factories.

### **America Pathways to the Present ,1995      France, Mexico and Informal Empire in Latin America, 1820-1867**

Edward Shawcross,2018-02-06 This book explores French imperialism in Latin America in the nineteenth century taking Mexico as a case study The standard narrative of nineteenth century imperialism in Latin America is one of US expansion and British informal influence However it was France not Britain which made the most concerted effort to counter US power through Louis Napol on s military intervention in Mexico begun in 1862 which created an empire on the North American continent under the Habsburg Archduke Ferdinand Maximilian Despite its significance to French and Latin American history this French imperial project is invariably described as an illusion an adventure or a mirage This book challenges these conclusions and places the French intervention in Mexico within the context of informal empire It analyses French and Mexican ideas about monarchy in Latin America responses to US expansion and the development of anti Americanism and pan Latinism the consolidation of Mexican conservatism and finally the collaboration of some Mexican elites with French imperialism An important dimension of the relationship between Mexico and France explored in the book is the transatlantic and transnational context in which it developed where competing conceptions of Mexico and France as nations the role of Europe and the United States in the Americas and the idea of Latin America itself were challenged and debated      Human

Dougherty,2016-07-15 The last two

decades have witnessed a dramatic expansion and intensification of mineral resource exploitation and development across the global south especially in Latin America This shift has brought mining more visibly into global public debates and spurred a great deal of controversy and conflict This volume assembles new scholarship that provides critical perspectives on these issues The book marshals original empirical work from leading social scientists in a variety of disciplines to address a range of questions about the practices of mining companies on the ground the impacts of mining on host communities and the

responses to mining from communities civil society and states The book further explores the global and international causes consequences and innovations of this new era of mining activity in Latin America Key issues include the role of Canadian mining companies and their investment in the region and to a lesser extent the role of Chinese mining capital Several chapters take a regional perspective while others are based on empirical data from specific countries including Bolivia Brazil El Salvador Guatemala and Peru *America* Andrew Robert Lee Cayton, Elisabeth Israels Perry, Allan M.
