Communicating and Strategising Leadership in British Elections Alia Middleton, 2021-03-17 This book concentrates on the leaders of the Conservatives Labour and Liberal Democrats in British general election campaigns between 2010 and 2019 by exploring where they visit during the campaign and why the impact they have and how leadership is represented in the Press It establishes the key strategic underpinnings for their visits and the types of activities they undertake in a uniquely British context The degree to which leaders and their visits form an important dimension of voter behaviour is also considered Moreover the book explores how the Press delve into the personal lives of lesser known opposition leaders and scrutinise the policies of Prime Ministers The types of visits by leaders that become newsworthy are identified alongside their importance as a framing tool in election reporting Beyond the leaders themselves press reporting on their personal relationships is scrutinised showing an increased acceptance of active partnership **Political Science**

implications for the American political landscape he demonstrates that sorting makes voters more loyally partisan allowing campaigns to focus more attention on mobilizing committed supporters Ultimately Levendusky concludes this new link between party and ideology represents a sea change in American politics Vote Power Movement for a New

This Handbook brings together in one volume the work of the world's foremost political consultants marketing experts and political scientists Scholars and political professionals from nine different countries have contributed original chapters that provide a state of the art review of the role of marketing good and bad in political campaigns The Handbook's 40 chapters are organized in six sections that provide an exhaustive review of political marketing Each section includes a rich blend of academic and practitioner authors often collaborating on chapters resulting in a rich blend of theory and practice The Handbook of Political Marketing is the essential field manual for academics politicians campaign specialists and anyone interested in the role of marketing in politics *The Logic of Pre-electoral Coalition Formation* Sona Nadenichek

Golder, 2006 Why do some parties coordinate their electoral strategies as part of a pre electoral coalition while others choose to compete independently at election time Scholars have long ignored pre electoral coalitions in favor of focusing on the government coalitions that form after parliamentary elections Yet electoral coalitions are common they affect electoral outcomes and they have important implications for democratic policy making itself The Logic of Pre Electoral Coalition Formation by Sona Nadenichek Golder includes a combination of methodological approaches game theoretic statistical and historical to explain why pre electoral coalitions form in some instances but not in others The results indicate that pre electoral coalitions are more likely to form between ideologically compatible parties They are also more likely to form when the expected coalition size is large but not too large and when the potential coalition partners are similar in size Ideologically polarized party systems and disproportional electoral rules in combination also increase the likelihood of electoral coalition formation Golder links the analysis of pre electoral coalition formation to the larger government coalition literature by showing that pre electoral agreements increase a the likelihood that a party will enter government b the ideological compatibility of governments and c the speed with which governments take office In addition pre electoral coalitions provide an opportunity for combining the best elements of the majoritarian vision of democracy with the best elements of the proportional vision of democracy **Ties that Bind** James Bickerton, Patrick J. politics in Canada may seem a strange amalgam of predictability and surprise stability and volatility At the close of the twentieth century the party in power is the same one that governed at the beginning of the century and for an inordinate amount of time in between Yet the contemporary party system seems to bear little relation to that which characterized either turn of the century or mid century Canadian politics In fact several dramatic upheavals have taken place in the relationship between parties and voters Elections clarify for parties and voters the current character of their relations Partially obscured

vaguely calibrated or hidden perils in the voter party relationship will often rise to the surface during election periods and the ties that bind diverse communities of voters to particular parties are tested Clearly the relationship between Canadian voters and their political parties has seldom been an easy one especially at election time However to describe it as unstable or volatile would be misleading There have always been strong currents of continuity and stability in voter party relations in Canada that are deeply rooted in regional political cultures and party histories in enduring ties between ethnocultural or linguistic groupings and particular parties and in the economic and class cleavages that influence left right ideological divisions Ties That Bind looks at the socio economic ethnolinguistic and demographic factors in party support the enduring quality of these social bases the importance of geography in structuring variations in the voter party relationship and electoral change as a function of the strategic decisions of the parties and their leaders and the voter response these decisions evoke

Gender Dynamics in Congressional Elections Richard Logan Fox,1997 What happens in an electoral environment involving female candidates Do women face different challenges during the electoral process How do gender dynamics alter the conventional norms of electoral politics Do women campaign differently from men Do male candidates pay more attention to women s issues or make other strategic and behavioral changes when opposed by a female candidate Author Richard Logan Fox answers these questions and many others with compelling evidence that suggests that women candidates are having a profound impact on the electoral process In Gender Dynamics in Congressional Elections Fox studies the congressional races of 1992 and 1994 in California in which a record 19 women were candidates for House seats He contrasts the experiences of both the male and female candidates and sheds new light on the different challenges women face during political campaigns Providing a groundbreaking examination of an understudied topic Gender Dynamics in Congressional Elections will be essential for students and professionals in political science *Economics* Alan E.
