communication skills that are the key to good documentation *Chart to Save Your RN License* Lena Empyema, 2021-08-11

You can be an excellent nurse in the clinical setting and still fail to prove that you are an excellent nurse if your documentation is inadequate. Having worked in a variety of inpatient and outpatient settings, I understand the obstacles nurses face. There's just not time nor do nurses have the mental energy to meticulously document every little thing on top of the rest of their to-do list. That's part of why I became passionate about documentation education. It doesn't have to be an overwhelming, endless challenge to chart exhaustively in hopes that you enter enough data into the chart to defend yourself one day. Rather, leveraging the most critical data, knowing how to format notes and exactly what to say and when to spend five minutes dumping information into the chart can be learned skills that make documentation faster, easier, and less stressful while doing a better job of defending your actions.
