Eddy, 2008-04-04 This volume explores how key aspects of No Child Left Behind NCLB have transformed the landscape of educational evaluation and ultimately how this process is redefining what evaluation is within the educational evaluation community In their chapters the authors examine case studies critical commentaries and technical information related to the nexus between evaluation and NCLB The volume is intended to stimulate conversation around fundamental issues in the discipline of evaluation including blurring the lines among research evaluation and assessment prioritizing summative evaluations over formative using questions to drive research design rather than the reverse balancing accountability requirements with other stakeholder needs exploring the role of evaluation capacity building in an institutional setting understanding the availability and appropriate use of assessment data and defining learning outcomes that are based on standardized test scores alone Evaluative activities have become integrated into the fabric of NCLB primarily through two core aspects of the legislation responding to accountability systems and implementing scientifically based research One plausible consequence of this close integration is that the purpose design and practice of evaluation may actually be transformed by this legislation This volume describes these transformative influences and then explores the potential consequences This is the 117th volume of the Jossey Bass quarterly report series New Directions for Evaluation an official publication of the American Evaluation Association Plant Tropisms Simon Gilroy, Patrick Masson, 2008-06-02 Tropisms the defined vectorial stimuli such as gravity light touch humidity gradients ions oxygen and temperature which provide guidance for plant organ growth is a rapidly growing and changing field The last few years have witnessed a true renaissance in the analysis of tropisms As such the conception of tropisms has changed from being seen as a
