

User maintenance instructions

Cleaning the drain pump filter

Filter system in your washer prevents solid items such as buttons, coins and fabric fibers clogging the pump impeller during discharging of the washing water. Thus, a good water discharge is achieved and the pump life is extended.

- If your washer fails to drain the water, the pump filter may be clogged. You may have to clean it occasionally to prevent any clogging. Water must be drained completely to clean the pump filter.

In addition, water may have to be drained off completely in the following cases:

- before transporting the appliance (e.g. when moving)
- when there is a danger of frost

In order to clean the dirty filter and discharge the water;

1- Disconnect or unplug the washer from the power supply.

WARNING

- ⓘ There may be water at 158°F (70°C) in the drum. Therefore, the filter must be cleaned only after the inside water is cooled down to avoid hazard of scalding.

2- Open the filter cap. The filter cap may be composed of one or two pieces according to the model of your washer.

If it is composed of two pieces, press the tab on the filter cap downwards and pull the piece out towards yourself.

If it is composed of one piece, hold it from both sides and open it by pulling out.

3- An emergency drain hose is supplied with your washer.

Blomberg Dkn 5880 Owners Manual

Thomas Griffiths

Blomberg Dkn 5880 Owners Manual:

Uncover the mysteries within Crafted by is enigmatic creation, **Blomberg Dkn 5880 Owners Manual** . This downloadable ebook, shrouded in suspense, is available in a PDF format (Download in PDF: *).
