

Before you begin

Thank you for purchasing the Bose® Wave® radio.

Customer support is provided by Bose Corporation. Being able to identify its products correctly promotes proper handling, which can extend "lifetime" of the Bose® product. Please observe the following:

Using this technology, it takes extremely tiny signals from a small loudspeaker to the outside air over a wide range of frequencies. Therefore it is the high-fidelity design that makes the Wave radio "breathe" and creates music that produces music being heard as if it were there.

Features

The Wave radio also includes:

- Integrated system design for superior quality without component adjustments
- A high-performance stereo tuner — offers up to 5 AM and 5 FM station presets
- Two independent clocks, with battery backup power for reminder settings
- A credit card size remote control with recording time preview
- Input for an additional sound source, such as a CD or tape player

Please take the time to follow this owner's guide carefully. It helps you set up and operate your radio and enjoy all of its features and high-fidelity sound.

Setting Up

Unpacking the radio

Check the inside your radio. There is packing material for protection from use. The correct packing material inside the radio was designed for the Wave radio. If you used the correct packing material, do not discard it until it is clearly stated "Customer Service Center Only" and return material to the radio (see note).

Check to see your Wave radio matches the photo illustration in Figure 1.

Note: First, find the serial number on the bottom of your radio. Write it on your record card and in the label attached to Figure 1.

Selecting a location for your radio

Please read these guidelines in mind when selecting a location for your radio.

- Place the radio on a table or other flat surface.
- Do not use the radio in a damp location. It is important to prevent moisture from getting into the unit.
- Do not place it on a metal surface or table that causes interference with AM reception.
- Since all electronic equipment generates some heat, do not place it on a heat sensitive surface.
- If you use the radio with your television or VCR, do not place it directly in front of the television. It may interfere with the picture quality.
- A wooden surface may help if a radio is recommended for best stereo performance.
- You get the maximum sound from your radio if you are able to place the radio across the room from where you will be listening.

Please adjust the location to get the sound you prefer.
