The Astrograph ,1987 **The 20-cm Schmidt-Cassegrain Telescope** Peter L. Manly,1999-10-14 A complete 2004 how to guide packed with advice on the most popular telescope in the world **Astronomy** ,1997 Astronomy Now ,2006

Observing the Moon Peter T. Wlasuk,2013-04-17 Why write another guide to observing the Moon That was the question I was pondering as I began this project having a fine collection of classic lunar guidebooks dating back to 1791 in my own library As a Fellow of the Royal Astronomical Society RAS member of the American Astronomical Society's Division for Planetary Sciences AAS DPS and member of the American Geophysical Union AGU I am fortunate to know many professional lunar scientists who keep me up to date with developments in lunar science contrary to public perception lunar science has definitely not stagnated since the last Apollo No 17 left the surface of the Moon in December 1972 I am also lucky to know many amateur lunar observers who like me enjoy actually looking at the Moon with telescopes and imaging it with a wide variety of devices ranging from regular 35 mm cameras to video recorders and CCD cameras My friends who study the Moon whether in their professions or just for fun gave me several reasons for doing another lunar guidebook First the last lunar observer's guide of any length was published over ten years ago and many reviewers noted that it was badly out of date even then Deep Sky ,1983 *Journal of the Arkansas Academy of Science* ,2004 Monthly Notes of the Astronomical Society of Southern Africa Astronomical Society of Southern Africa,2008 *Spectral Line Shapes in Astrophysics* Luka C. Popovic,Milan S. Dimitrijevic,2007-10-03 The VI Serbian Conference on Spectral Line Shapes in Astrophysics was about the investigation of spectral line shapes in extragalactic objects such as active galactic nuclei stellar atmospheres and astrophysical spectra in general Atomic spectral line shapes in various discharges and plasma devices was also discussed The main purpose of the Conference was to present and discuss new results found by participants working in this research field and to review significant topics **Choosing and Using a Schmidt-Cassegrain Telescope** Rod Mollise,2012-12-06 Amateur astronomy is becoming more and more popular mostly because of the availability of relatively low cost astronomical telescopes of superb quality commercially made Schmidt Cassegrain and Maksutovs Rod Mollise's book contains everything amateur astronomers need to know about these telescopes Featuring but not exclusively the ubiquitous Meade and Celestron ranges he describes what these instruments will do how to use them and which are the best to choose This book includes everything There are sections on accessories observing techniques and hints and tips gleaned from his 25 years experience with this type of telescope cleaning collimating maintaining the telescope and mounting using the telescope in various conditions computer control imaging wet digital and CCD This is the perfect book for amateur astronomers who are about to invest in a new Schmidt Cassegrain or Maksutov telescope or for those who already have one and want to get the best out of it *Sterne und Weltraum* ,1999 **Modern Photography** ,1989 **Astronomy and Astrophysics Monthly Index** ,1989 **Popular Photography** ,1990 *The Celestron NexStar Evolution 8 Telescope*
