index **The Institutional Topology of International Regime Complexes** Benjamin Daßler,2023-09-12 The implicit
topology of international institutional complexes varies greatly across policy areas In some areas the lion s share of everyday
policy cooperation is shaped by a single institution with alternative and more regional institutions operating in its shadow In
other policy fields institutional structures appear to be different seeing a range of non hierarchical decentralized alternative
institutions The Institutional Topology of International Regime Complexes Mapping Inter Institutional Structures in Global
Governance provides a systematic conceptualization and explanation of the evolution of these varying institutional topologies
underlying regime complexes across five issue areas of Global Governance Intellectual Property Protection Tax Avoidance
Financial Stability Development Aid and Energy Governance By providing an empirically grounded network based
conceptualization and mapping of institutional topologies as well as a theoretical explanation for their variation across policy
space and time the book offers a comprehensive analysis of both the empirical manifestation of inter institutional structures
across various policy fields of Global Governance and the issue specific factors that shape the varying institutional
trajectories spurring de centralization Da ler combines quantitative network analyses with qualitative case studies to trace
institutional decentralization processes across five highly relevant issue areas of Global Governance This volume shows how
the nature of issue specific cooperation problems translates into disparate structures among multilateral institutions
occupying the same regime complex In light of growing concerns about the future trajectories of Global Governance in times
of heightened geopolitical tensions Da ler offers a fresh perspective to comparatively capture the profoundly varying
institutional landscapes across different issue areas and their associated challenges and benefits of multilateral cooperation
Transformations in Governance is a major academic book series from Oxford University Press It is designed to accommodate
the impressive growth of research in comparative politics international relations public policy federalism and environmental
and urban studies concerned with the dispersion of authority from central states to supranational institutions subnational
governments and public private networks It brings together work that advances our understanding of the organization
causes and consequences of multilevel and complex governance The series is selective containing annually a small number of
books of exceptionally high quality by leading and emerging scholars The series is edited by Liesbet Hooghe and Gary Marks
