## Concept Development 8 1:

*Early Category and Concept Development* David H. Rakison, Lisa M. Oakes, 2008-12-30 Whether or not infants earliest perception of the world is a blooming buzzing confusion it is not long before they come to perceive structure and order among the objects and events around them At the core of this process and cognitive development in general is the ability to categorize to group events objects or properties together and to form mental representations or concepts that encapsulate the commonalities and structure of these categories Categorization is the primary means of coding experience underlying not only perceptual and reasoning processes but also inductive inference and language The aim of this book is to bring together the most recent findings and theories about the origins and early development of categorization and conceptual abilities Despite recent advances in our understanding of this area a number of hotly debated issues remain at the center of the controversy over categorization Researchers continue to ask questions such as Which mechanisms for categorization are available at birth and which emerge later What are the relative roles of perceptual similarity and nonobservable properties in early classification What is the role of contextual variation in categorization by infants and children Do different experimental procedures reveal the same kind of knowledge Can computational models simulate infant and child categorization How do computational models inform behavioral research What is the impact of language on category development How does language partition the world This book is the first to address these and other key questions within a single volume The authors present a diverse set of views representing cutting edge empirical and theoretical advances in the field The result is a thorough review of empirical contributions to the literature and a wealth of fresh theoretical perspectives on early categorization

**The Oxford Handbook of Developmental Psychology, Vol. 1** Philip David Zelazo, 2013-03-21 This handbook provides a comprehensive survey of what is now known about psychological development from birth to biological maturity and it highlights how cultural social cognitive neural and molecular processes work together to yield human behavior and changes in human behavior

**Technical Abstract Bulletin**, Business Process Transformation Varun Grover, M. Lynne Markus, 2008 Annotation Featuring contributions from prominent thinkers and researchers this volume in the Advances in Management Information Systems series provides a rich set of conceptual empirical and introspective studies that epitomize fundamental knowledge in the area of Business Process Transformation Processes are interpreted broadly to include operational and managerial processes within and between organizations as well as those involved in knowledge generation Transformation includes radical and incremental change its conduct management and outcome The editors and contributing authors pay close attention to the role of IS organizations and information technologies in facilitating business process transformation Each chapter places major emphasis on clearly articulating the knowledge generated both theoretical and applied The book incorporates case studies and tables throughout and provides fundamental grounding for any stakeholder of business process transformation
