

## CONCEPTUAL MAGNETISM

### SUITABLE FOR PRIMARY LEVEL

#### SCIENCE TIPS;

#### SENSORY LEARNING;

For the sake of understanding of this science as a discipline, sensory learning is highly recommended.

This is a categorization of learning styles according to the sensory modalities that are applied for learning information. Generally, four modalities are distinguished: Visual, Aural (sound), Read/write, and Kinesthetic (touch). Learners usually prefer a certain sensory style of learning and this is where sensory learning techniques help. sensory learning techniques means just what it sounds like, it is all about using visual (sight), auditory (hearing), kinesthetic senses (touch and balance), gustatory (taste) and olfactory (smell) to teach and help children to remember. However;

**TAKE CARE** when dealing with some specific scientific material because some of them are poisonous for tasting, dangerous for touching e.g. electricity, acid.

**SO** always, ensure safety when using such methods of learning.

#### COLLABORATIVE LEARNING TECHNIQUES

Some Examples of Collaborative Learning Techniques:

*Think/Write, Pair, Share:* The think/write, pair, share strategy is a cooperative learning technique that encourages individual participation and is applicable across all grade levels and class sizes. Students think through questions using three distinct steps:

1. Think/Write: Students think independently about a question that has been posed, forming ideas of their own and writing them down.
2. Pair: Students are grouped in pairs to discuss their thoughts. This step allows students to articulate their ideas and to consider those of others.
  1. Share: Student pairs share their ideas with a larger group, such as the whole class. Often, students are more comfortable presenting ideas to a group with the support of a partner. In addition, students' ideas have become more refined through this three-step process.

*Round Table:* Round Table is a collaborative learning technique that allows students to assess prior knowledge, recall information and practice communication skills. The steps are:

1. Write: Each student writes one (or two or 3) sentences about a given topic (or this could be an answer to a question) on a piece of paper.
2. Share: The paper is passed around to one group member at a time. Each group member responds in writing.
