A Historical Introduction to the Philosophy of Science John Losee, 2001-03-01 John Losee provides a balanced and engaging survey of the development of views about scientific method Ideal for those coming to the subject for the first time this fully updated new edition incorporates discussion on contemporary debates including philosophy of biology normative naturalism theory appraisal experimental practice and scientific realism Concise profiles of the major philosophers discussed within the text are provided including Aristotle Galileo Newton Whewell Hempel and Kuhn

Nursing Theorists and Their Work Martha Raile Alligood, PhD, RN, ANEF, 2013-09-24 The most comprehensive of its kind *Nursing Theorists and Their Work* 8th Edition provides an in depth look at 39 theorists of historical international and significant importance Each chapter features a clear consistent presentation of a key nursing philosophy or theory Case studies critical thinking activities and in depth objective critiques of nursing theories help bridge the gap between theory and application Critical Thinking Activities at the end of each theorist chapter help you to process the theory presented and apply it to personal and hypothetical practice situations A case study at the end of each theorist chapter puts the theory into a larger perspective demonstrating how it can be applied to practice A Brief Summary in each theorist chapter helps you review for tests and confirm your comprehension A Major Concepts Definitions box included in each theorist chapter outlines the theory's most significant ideas and clarifies content specific vocabulary Each theorist chapter is written by a scholar specializing in that particular theorist's work often having worked closely with the theorists to provide the most accurate and complete information possible Beginning chapters provide a strong foundation on the history and philosophy of science logical reasoning and the theory development process Diagrams for theories help you visualize and better understand

inherently abstract concepts Pictures of theorists as well as a listing of contact information for each individual enables you to contact the source of information directly Theorist chapters have been reviewed and edited by the theorist validating the accounts set forth in the text for currency and accuracy An extensive bibliography at the conclusion of each theorist chapter outlines numerous primary and secondary sources of information ideal for both undergraduate and graduate research projects NEW Quotes from the theorist make each complex theory more memorable NEW Chapter on Afaf Meleis profiles a theorist who has shaped theoretical development in nursing and explores her transition theory NEW Need to Know Information is highlighted to streamline long complex passages and help you review key concepts NEW Points for Further Study at the end of each chapter direct you to assets available for additional information Living Machines Tony J. Prescott,Nathan Lepora,Paul F. M. J. Verschure,2018 Contemporary research in the field of robotics attempts to harness the versatility and sustainability of living organisms with the hope of rendering a renewable adaptable and robust class of technology that can facilitate self repairing social and moral even conscious machines This landmark volume surveys this flourishing area of research **Biology: How Life Works** James Morris,Daniel Hartl,Andrew Knoll,Robert Lue,Melissa Michael,Andrew Berry,Andrew Biewener,Brian Farrell,N. Michele Holbrook,Jean Heitz,2019-02-05 BIOLOGY HOW LIFE WORKS has been a revolutionary force for both instructors and students in the majors biology course It was the first truly comprehensive set of integrated tools for introductory biology seamlessly incorporating powerful text media and assessment to create the best pedagogical experience for students THE VISUAL PROGRAM The already impressive visual program has been greatly improved and expanded The powerful Visual Synthesis tools have been reimaged allowing for more flexibility for both students and instructors A new Tour Mode allows for learning objective driven tours of the material and deep linking from the eText allow the student to jump straight from the text into a rich visual representation of the content Instructors can also create customized tours to use for engaging in class presentations And finally new animations have been added to the library including a new 3D animation to support the animal physiology content A FOCUS ON SCIENTIFIC SKILLS The third edition does even more to teach students the skills they need to think like a scientist along with the content they need to move beyond the introductory course New Skills Primers are self paced tutorials that guide students to learn practice and use skills like data visualization experimental design working with numbers and more New How Do We Know activities accompany the feature in the text and teach students to understand scientific inquiry THE HUB The best teaching resources in the world aren't of use if instructors can't find them The HUB provides a one stop destination for valuable teaching and learning resources including all of our well vetted in class activities IMPROVED ORGANIZATION OF TOPICS We implemented several organizational changes based on extensive user feedback with the goal of creating an improved narrative for students and a more flexible teaching framework for instructors A new chapter on Animal Form Function and Evolutionary History leads off the animal anatomy and physiology chapters to provide a whole body view of structure and

function and to provide better context for the more specific systems in following chapters The ecology coverage has been enriched and reorganized for a more seamless flow A new chapter on Ecosystem Ecology combines ecosystem concepts formerly housed in separate chapters to present a more cohesive view of the flow of matter and energy in ecosystems All of these changes and improvements represent the next step in the life of Biology How Life Works We think we have created the best learning resource for introductory biology students and we think instructors will find joy in the improvements they can make in their classes with these materials
